

1. Record Nr.	UNISA996418275203316
Titolo	Computational and Analytic Methods in Science and Engineering [[electronic resource] /] / edited by Christian Constanda
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Birkhäuser, , 2020
ISBN	3-030-48186-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (X, 258 p. 94 illus., 62 illus. in color.)
Disciplina	620.00151
Soggetti	Computer mathematics Numerical analysis Mathematical models Computational Science and Engineering Numerical Analysis Mathematical Modeling and Industrial Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	New Numerical Results for the Optimization of Neumann Eigenvalues -- Transient Convection-Diffusion-Reaction Problems with Variable Velocity Field by Means of DRBEM with Different Radial Basis Functions -- On a Parametric Representation of the Angular Neutron Flux in the Energy Range from 1 eV to 10MeV -- A Boundary Integral Equation Formulation for Advection-Diffusion-Reaction Problems with Point Sources -- Displacement Boundary Value Problem for a Thin Plate in an Unbounded Domain -- A Dirichlet Spectral Problem in Domains Surrounded by Thin Stiff and Heavy Bands -- Spectral Homogenization Problems in Linear Elasticity with Large Reaction Terms Concentrated in Small Regions of the Boundary -- The Mathematical Modelling of the Motion of Biological Cells in Response to Chemical Signals -- Numerical Calculation of Interior Transmission Eigenvalues with Mixed Boundary Conditions -- An Inequality for Hölder Continuous Functions Generalizing a Result of Carlo Miranda -- Two-Phase Three-Component Flow in Porous Media: Mathematical Modeling of Dispersion-Free Pressure Behavior -- Error Analysis and the Role of Permutation in

Sommario/riassunto

This contributed volume collects papers presented at a special session of the conference Computational and Mathematical Methods in Science and Engineering (CMMSE) held in Cadiz, Spain from June 30 - July 6, 2019. Covering the applications of integral methods to scientific developments in a variety of fields, ranging from pure analysis to petroleum engineering, the chapters in this volume present new results in both pure and applied mathematics. Written by well-known researchers in their respective disciplines, each chapter shares a common methodology based on a combination of analytic and computational tools. This approach makes the collection a valuable, multidisciplinary reference on how mathematics can be applied to various real-world processes and phenomena. Computational and Analytic Methods in Science and Engineering will be ideal for applied mathematicians, physicists, and research engineers.
