

1. Record Nr.	UNISA996418442303316
Autore	Lienert Matthias
Titolo	Multi-time wave functions : an introduction / / Matthias Lienert, Solren Petrat, Roderich Tumulka
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2020] Â©2020
ISBN	3-030-60691-0
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (VIII, 89 p. 30 illus.)
Collana	SpringerBriefs in Physics
Disciplina	530.12
Soggetti	Quantum theory Gravitation Particles (Nuclear physics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction and Overview -- Consistency Conditions -- Relativistic Point Interactions -- Multi-Time Quantum Field Theory -- Interior-Boundary Conditions -- Born's Rule -- Multi-Time Integral Equations.
Sommario/riassunto	The natural generalization of the quantum-mechanical N-particle wave function to relativistic space-time is a function of N space-time points, and thus of N time variables. This book, a collection of lectures given at a spring school in Tübingen in 2019, provides an accessible and concise introduction to the recent development of the theory of multi-time wave functions, their use in quantum field theory, their relation to detection probabilities, and the mathematical question of consistency of their time evolution equations. The book is intended for advanced students and researchers with an interest in relativity and quantum physics.
