Note generali	Refereed/Peer-reviewed
Sommario/riassunto	Antimicrobial Stewardship & Healthcare Epidemiology (ASHE) is a fully Gold Open Access journal that invites submissions of original investigations that will contribute to the fields of antimicrobial stewardship and the prevention of healthcare-associated infections, as well as other areas of quality improvement affecting health systems, with the ultimate goal of improving healthcare safety. Covered topics include the following broad areas of interest: infection prevention,

antimicrobial stewardship, healthcare epidemiology, diagnostic stewardship, healthcare worker vaccination, public health policy, and occupational health concerns including blood-borne pathogen exposure prevention.
