

1. Record Nr.	UNISA996438248303316
Titolo	Climate change ecology
Pubbl/distr/stampa	[Amsterdam] : , : Elsevier, , 2021-
ISSN	2666-9005
Descrizione fisica	1 online resource
Soggetti	Climatic changes Animal populations - Climatic factors Climat - Changements Animaux - Populations - Facteurs climatiques Periodical periodicals. Periodicals. Périodiques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Sommario/riassunto	"The journal Climate Change Ecology is an Open Access journal for terrestrial, marine, and freshwater ecological research looking at ecosystem adaptations or responses to anthropogenic climate change. Increasingly climate research is focused on the complexity of processes and responses across trophic webs and networks, highlighting how individual species' response to climate change affects its ecological system. As modeling has grown increasingly sophisticated, data from multiple actors in ecological networks leads to a fuller picture of the nonlinear dynamics of ecosystem processes and also to a clearer understanding of predictive challenges."--Publisher
