

1. Record Nr.	UNISA996457351303316
Autore	BARNES, Steven A.
Titolo	Death and redemption : the Gulag and the shaping of Soviet society / Steven A. Barnes
Pubbl/distr/stampa	Princeton ; Oxford, : Princeton University Press, 2011
ISBN	0-691-15112-1
Descrizione fisica	Testo elettronico (PDF) (X, 352 p.) : ill.
Disciplina	365.450947
Soggetti	Campi di concentramento sovietici
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
Sommario/riassunto	Il volume offre una reinterpretazione fondamentale del ruolo del Gulag - il vasto sistema dell'Unione Sovietica di campi di lavoro forzato, esilio interno e prigionieri - nella società sovietica. Le autorità sovietiche avevano indubbiamente i mezzi per sterminare tutti i prigionieri che passavano attraverso il Gulag, ma a differenza dei nazisti non concepivano i loro campi di concentramento come strumenti di genocidio. In questo libro provocatorio, Steven Barnes sostiene che il Gulag deve essere inteso principalmente come un'istituzione penale in cui ai prigionieri veniva data un'ultima possibilità di reintegrarsi nella società sovietica. Milioni di persone che le autorità ritenevano "rieducate" attraverso il brutale lavoro forzato sono state autorizzate ad andarsene. Altre invece non ne sono mai uscite vive. Attingendo agli archivi di recente apertura in Russia e Kazakistan, nonché alle memorie di prigionieri, Barnes mostra come il Gulag fosse parte integrante dell'obiettivo sovietico di costruire una società socialista utopica. Lo studio rivela come il Gulag definisse il confine tra coloro che sarebbero rientrati nella società sovietica e coloro che ne sarebbero stati esclusi con la morte.

2. Record Nr.	UNINA9910814430903321
Autore	Rivers David B. <1966->
Titolo	The science of forensic entomology / / David B. Rivers, Gregory A. Dahlem
Pubbl/distr/stampa	Chichester, England : , : Wiley Blackwell, , 2014 2014
ISBN	1-118-40303-7 1-119-94036-2 1-118-40304-5
Descrizione fisica	1 online resource (402 p.)
Collana	New York Academy of Sciences
Altri autori (Persone)	DahlemGregory A
Disciplina	614/.17
Soggetti	Carrion insects Flies Forensic entomology Postmortem changes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The Science of Forensic Entomology; Copyright; Contents; About the companion website; Preface; Chapter 1 Role of forensic science in criminal investigations; Overview; The big picture; 1.1 What is forensic science?; 1.2 Application of science to criminal investigations; 1.2.1 Physical evidence; 1.2.2 Collection of evidence; 1.2.3 The scientific method is the key to forensic analyses; 1.2.4 Analysis of physical evidence; 1.3 Recognized specialty disciplines in forensic science; 1.3.1 Forensic pathology; 1.3.2 Forensic anthropology; 1.3.3 Forensic dentistry (odontology) 1.3.4 Forensic psychology and psychiatry 1.3.5 Forensic toxicology; 1.3.6 Computer forensic science/computer forensics; 1.3.7 Forensic botany; Chapter review; What is forensic science?; Application of science to criminal investigations; Recognized specialty disciplines in forensic science; Test your understanding; Notes; References cited; Supplemental reading; Additional resources; Chapter 2 History of forensic entomology; Overview; The big picture; 2.1 Historical records of early human civilizations suggest understanding of insect biology

and ecology

2.2 Early influences leading to forensic entomology 2.2.1 Thirteenth-century China; 2.2.2 Seventeenth-century Europe; 2.2.3 Eighteenth-century Europe; 2.3 Foundation for discipline is laid through casework, research, war, and public policy; 2.3.1 Casework in Europe; 2.3.2 Influences from the United States; 2.4 Turn of the twentieth century brings advances in understanding of necrophagous insects; 2.5 Forensic entomology during the "great" wars; 2.6 Growth of the discipline due to the pioneering efforts of modern forensic entomologists leads to acceptance by judicial systems and public

Chapter review Historical records of early human civilizations suggest understanding of insect biology and ecology; Early influences leading to forensic entomology; Foundation for discipline is laid through casework, research, war, and public policy; Turn of the twentieth century brings advances in understanding of necrophagous insects; Forensic entomology during the "great" wars; Growth of the discipline due to the pioneering efforts of modern forensic entomologists leads to acceptance by judicial systems and public; Test your understanding;

Level 1: knowledge/comprehension

Level 2: application/analysis Notes; References cited; Supplemental reading; Additional resources; Chapter 3 Role of insects and other arthropods in urban and stored product entomology; Overview; The big picture; 3.1 Insects and other arthropods are used in civil, criminal, and administrative matters pertinent to the judicial system; 3.2 Civil cases involve disputes over private issues; 3.3 Criminal law involves more serious matters involving safety and welfare of people; 3.4 Administrative law is concerned with rulemaking, adjudication, or enforcement of specific regulatory agendas

3.5 Stored product entomology addresses issues of both a civil and criminal nature

Sommario/riassunto

The Science of Forensic Entomology is designed to meet the growing needs of colleges, universities, and forensic investigative agencies in training undergraduates, graduate students, and criminal investigators the principles, concepts and methodologies necessary to use insects and other arthropods in legal matters. The book offers an advanced introduction to the field but also provides in depth discussion of biological concepts associated with insect biology, ecology, physiology and chemical communication.
