

1. Record Nr.	UNISA996464425003316
Titolo	Intelligent robotics and applications . Part II : 14th International Conference, ICIRA 2021, Yantai, China, October 22-25, 2021, proceedings / / Xin-Jun Liu [and four others] (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-89098-8
Descrizione fisica	1 online resource (853 pages)
Collana	Lecture notes in computer science. Lecture notes in artificial intelligence ; ; 13014
Disciplina	629.892
Soggetti	Robotics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Contents - Part II -- Hybrid System Modeling and Human-Machine Interface -- Generation of Collision-Free Five-Axis Sweep Scanning Path Using Graphics Engine -- 1 Introduction -- 2 Preliminary -- 3 Collision-Free Scanning Path Planning -- 3.1 Image-Based Representation of Collision-Free Conditions -- 3.2 Collision Detection by Graphics Engine -- 3.3 Incremental Algorithm for Generating Admissible Areas -- 4 Experiment -- 5 Conclusion -- References -- Multi-robot Cooperative System Modeling and Control Software Development -- 1 Introduction -- 2 Multi-robot Collaborative System Modeling -- 2.1 Coordinated Operation Model -- 2.2 Kinematic Modeling -- 2.3 Dynamics Modeling -- 3 Collaborative Control System Frame and Methods -- 3.1 Control Frame Design -- 3.2 Position and Force Distribution -- 3.3 Motor Control and Motion Planning -- 3.4 Multi-arm Compliance Control Method -- 4 Control System Software -- 4.1 Demand Analysis -- 4.2 Overall Design -- 4.3 Design of Each Layer -- 4.4 Main Modules -- 4.5 Software Interface -- 5 Experiment Verification -- 5.1 Experimental System -- 5.2 Motion Planning Experiment -- 5.3 Compliance Control Experiment -- 6 Conclusion -- References -- Gesture Recognition and Conductivity Reconstruction Parameters Analysis with an Electrical-Impedance-Tomography (EIT) Based Interface: Preliminary Results -- 1

Introduction -- 2 The Hardware and Algorithm of Measurement System -- 2.1 Hardware -- 2.2 Construction Algorithms -- 3 Methods -- 3.1 Gesture Recognition Based on EIT -- 3.2 Conductivity Reconstruction Parameters Analysis -- 4 Results -- 4.1 Recognition Accuracy -- 4.2 The Effect of EIT Parameters -- 5 Discussions and Conclusions -- References -- Robot Manipulation Skills Learning -- Depth from Shading Based on Online Illumination Estimation Under RAMIS Environment -- 1 Introduction.

2 Shape from Shading -- 3 Method -- 4 Experiment and Result -- 5 Conclusion -- References -- Self-learning Visual Servoing for Robot Manipulation in Unstructured Environments -- 1 Introduction -- 2 Descriptions on Visual Servoing -- 3 Robust MCSIS Learning Estimator -- 4 Nonparametric Visual Servoing Framework -- 5 Results and Discussions -- 6 Conclusion -- References -- Obstacle Avoidance Methods Based on Geometric Information Under the DMPs Framework -- 1 Introduction -- 2 Obstacle Avoidance Based on Geometric Information -- 2.1 The Fundamental Principle of DMPs Framework -- 2.2 Obstacle Avoidance Based on Ellipsoidal Offset of Static Obstacles -- 2.3 Obstacle Avoidance Based on Dangerous Zone Offset of a Moving Obstacle -- 3 Simulation and Analysis -- 3.1 Simulation -- 3.2 Trajectory Evaluation in Static Obstacle Avoidance -- 4 Real Experiments in Static and Dynamic Environment -- 5 Conclusion -- References -- Integrated Classical Planning and Motion Planning for Complex Robot Tasks -- 1 Introduction -- 2 Literature Review -- 3 Methods -- 3.1 High-Level Task Planning -- 3.2 Low-Level Motion Planning -- 4 Experimental Results -- 5 Conclusion -- References -- Deep Reinforcement Learning for an Anthropomorphic Robotic Arm Under Sparse Reward Tasks -- 1 Introduction -- 2 Related Work -- 2.1 Curiosity Module -- 2.2 Curriculum Learning -- 2.3 Hierarchy Reinforcement Learning -- 3 Background -- 3.1 Reinforcement Learning -- 3.2 Policy Gradient Optimization -- 4 Method -- 4.1 Base Algorithm: Deep Deterministic Policy Gradient -- 4.2 Techniques for Sparse Rewards -- 5 Experiments and Results -- 5.1 Environments -- 5.2 Experimental Details and Results -- 6 Conclusion -- References -- Design and Experiment of Actuator for Semi-automatic Human-Machine Collaboration Percutaneous Surgery -- 1 Introduction -- 2 Actuator Design -- 2.1 Actuator Structure.

2.2 Guide Hole -- 3 Minimize Damage Insertion -- 4 Human-Machine Collaboration Workflow -- 5 Experiment and Results -- 6 Discussion -- References -- A Robot Learning from Demonstration Platform Based on Optical Motion Capture -- 1 Introduction -- 2 System Setup -- 2.1 The Optical MoCap System -- 2.2 Human-Machine Interface -- 3 Robot Learning from Demonstration -- 3.1 Data Pre-process -- 3.2 Policy Learning -- 4 Robot Assembly Experiment -- 4.1 Experiment Settings -- 4.2 Experimental Results and Discussion -- 5 Conclusion -- References -- Real-Time Collision Avoidance in a Dynamic Environment for an Industrial Robotic Arm -- 1 Introduction -- 2 Methods -- 2.1 Learning Dynamic Movement Primitives -- 2.2 Cost Function Formulation -- 2.3 Obstacle Position Estimation -- 2.4 Experimental Results -- 2.5 Conclusion -- References -- DOREP 2.0: An Upgraded Version of Robot Control Teaching Experimental Platform with Reinforcement Learning and Visual Analysis -- 1 Introduction -- 2 Overview of the DOREP 2.0 -- 2.1 DOREP 2.0 Components and Operational Procedures -- 2.2 Synchronization Between MATLAB and Bus Server -- 2.3 SIA Robot Toolbox -- 3 Visual Robot Inverted Pendulum Control Based on Reinforcement Learning -- 3.1 Introduction of Reinforcement Learning Algorithm -- 3.2 Introduction of Visual Analysis -- 3.3 Results of Experiment -- 4 Conclusion -- References --

An Improved TCN-Based Network Combining RLS for Bearings-Only Target Tracking -- 1 Introduction -- 2 Dynamic Model of Bearings-Only Target Tracking -- 3 TCN-Based Network Combining RLS -- 3.1 TCN-Based Network -- 3.2 Recursive Least Squares -- 4 Simulation -- 4.1 Initial Conditions -- 4.2 Simulation Results -- 5 Conclusions -- References -- Learning Robot Grasping from a Random Pile with Deep Q-Learning -- 1 Introduction -- 2 Background -- 2.1 Reinforcement Learning -- 2.2 Deep Q-learning Network. 3 Design of Grasping Strategy with DQN -- 3.1 Representations of the Target State -- 3.2 Representations of the Grasping Action -- 3.3 Design of the Rewards -- 3.4 Design of the Q-networks -- 3.5 Training of the Grasping DQN -- 4 Simulation and Experiment -- 4.1 Simulations -- 4.2 Strategy Transferring from Simulation to Real -- 5 Conclusion -- References -- Surplus Force Control Strategy of an Active Body-Weight Support Training System -- 1 Introduction -- 2 Mechanical Structure of BWSTS -- 3 Active Loading Compound Control Strategy -- 4 Surplus Force Compensation Control Strategy -- 5 Conclusion -- References -- Process Learning of Robot Fabric Manipulation Based on Composite Reward Functions -- 1 Introduction -- 2 Problem Description -- 3 Proposed Method -- 3.1 Compound Reward Function -- 3.2 Network Structure -- 4 Experiments -- 4.1 Single Task -- 4.2 Process Task -- 4.3 Compound Reward Function -- 5 Conclusions -- References -- Surface Crack Detection of Rubber Insulator Based on Machine Vision -- 1 Introduction -- 2 Surface Crack Detection System of Rubber Insulator -- 3 Surface Crack Detection Algorithm of Rubber Insulator -- 3.1 Dimension-Increased Bilateral Filtering -- 3.2 Image Segmentation -- 3.3 Crack Detection and Localization -- 4 Experiment and Analysis -- 5 Conclusion -- References -- A Hierarchical Force Guided Robot Assembly Method Using Contact State Model -- 1 Introduction -- 2 The Description of Robot Assembly -- 3 Hierarchical Force Guided Assembly Strategy -- 3.1 Assembly Process Modeling -- 3.2 Assembly Process -- 3.3 Phased Guidance Stage -- 4 Experiments -- 4.1 Experimental Platform -- 4.2 Results -- 5 Conclusion -- References -- A BAS-Based Strategy for Redundant Manipulator Tracking Continuous Moving Object in 3D Relative Velocity Coordinate -- 1 Introduction -- 2 Problem Formulation -- 2.1 Tracking Moving Object. 2.2 3D Relative Velocity Coordinate -- 2.3 The Principle for Tracking Moving Object -- 3 Control System Design -- 4 Simulation Results -- 4.1 Simulation Methodology -- 4.2 The Results of Tracking Moving Target -- 5 Conclusions -- References -- Leveraging Expert Demonstrations in Robot Cooperation with Multi-Agent Reinforcement Learning -- 1 Introduction -- 2 Related Work -- 2.1 Multi-Agent Reinforcement Learning -- 2.2 Imitation Learning -- 3 Methods -- 3.1 Reinforcement Learning Setup -- 3.2 Multiple Hindsight Experience Replay -- 3.3 Robot Teams Learning from Demonstrations -- 3.4 Imperfect Demonstrations -- 4 Experiments -- 4.1 Experimental Setup -- 4.2 Robot Training -- 4.3 Imperfect Demonstrations -- 5 Conclusions -- References -- Fault Diagnosis Method Based on Control Performance of Single-Leg Robot -- 1 Introduction -- 2 Robot Model Description -- 2.1 Physical Model -- 2.2 Feedback Linearization of Nonlinear Dynamic Model -- 3 LQ Controller Design -- 4 Fault Detection Based on LQ Control Performance -- 5 Verified Result -- 6 Conclusion -- References -- Robot Bolt Skill Learning Based on GMM-GMR -- 1 Introduction -- 2 Related Work -- 3 Method -- 3.1 Dynamic Time Warping (DTW) -- 3.2 GMM-GMR -- 4 Experiments Results -- 4.1 The Setting of the Experimental Environment -- 4.2 The Results of the Experiment -- 5 Conclusion -- References -- Traversability

Analysis for Quadruped Robots Navigation in Outdoor Environment --
1 Instruction -- 2 Related Works -- 3 Terrain Traversability Analysis --
3.1 Geometric Features Extraction -- 3.2 Visual Features from CNN --
3.3 Fusing of Geometric and Visual Features -- 4 Experiment Results
-- 4.1 CNN Training Results -- 4.2 Traversability Analysis -- 5
Conclusions -- References -- MicroNano Materials, Devices,
and Systems for Biomedical Applications.
A Calibration Method of Compliant Planar Parallel Manipulator.
