| 1. Record Nr. | UNISA996464434203316 |
| Titolo | Metaheuristics for finding multiple solutions // edited by Mike Preuss |
| Pubbl/distr/stampa | Cham, Switzerland : , : Springer, , [2021] ©2021 |
| ISBN | 3-030-79553-5 |
| Descrizione fisica | 1 online resource (322 pages) |
| Collana | Natural Computing Ser. |
| Disciplina | 518.1 |
| Soggetti | Computational intelligence Computer science Artificial intelligence |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Intro -- Foreword -- Preface -- Contents -- Multimodal Optimization: Formulation, Heuristics, and a Decade of Advances -- 1 Introduction -- 2 Definitions -- 2.1 The General Optimisation Problem -- 2.2 The Multimodal Optimization Problem -- 3 Performance Measures -- 4 Benchmark Suites and Problem Generators -- 5 Popular Algorithmic Approaches and History of the Field -- 6 Niching Competition Result Analysis -- 7 Conclusion -- References -- Representation, Resolution, and Visualization in Multimodal Optimization -- 1 Multimodal Optimization: The What and the Why -- 1.1 What Is a Mode? -- 1.2 Why Optimize Multiple Modes? -- 2 Representation, Resolution, and Basic Visualizations Plots -- 3 Visualizing the Multimodal Landscape: Local Optima Networks -- 4 Conclusion -- References -- Finding Representative Solutions in Multimodal Optimization for Enhanced Decision-Making -- 1 Introduction -- 2 Related Work -- 2.1 Classic Niching Methods -- 2.2 Recent Development -- 2.3 Differential Evolution -- 2.4 Hopkins-Statistic -- 2.5 Adaptable Non-maximal Suppression -- 3 Suppression-Radius-Based Niching (SRN) -- 3.1 Phase I-Identifying Representative Areas -- 3.2 Phase II-Guided Search Toward Representative Areas -- 4 Experiments -- 4.1 Experimental Design -- 4.2 Incorporating a User Specified Number of Optima -- 4.3 Automatic Estimation of the Number of Optima -- 4.4 No Specification |

of Number of Representatives -- 5 Conclusions -- References --
Lifting the Multimodality-Fog in Continuous Multi-objective
Optimization -- 1 Introduction -- 2 Related Work -- 3 Multimodality in
MO Optimization -- 3.1 Theoretical Foundations -- 3.2 Visualizing
Landscapes of Multi-objective Gradients -- 4 On the Properties of
State-of-the-Art Benchmarks -- 4.1 A Visual Overview -- 4.2
Interpretation and Categorization.
5 How Multi-objective Optimization Algorithms Can Capitalize from
Basins of Attraction -- 6 Conclusion -- References -- Towards Basin
Identification Methods with Robustness Against Outliers -- 1
Introduction -- 2 Nearest-Better Clustering -- 3 Related Research -- 4
Ideas for New Basin Identification Methods -- 5 Experiments -- 5.1
Determining Regression Models -- 5.2 Validation -- 6 Conclusions --
References -- Deflection and Stretching Techniques for Detection of
Multiple Minimizers in Multimodal Optimization Problems -- 1
Introduction -- 2 Deflection Technique -- 2.1 Basic Scheme -- 2.2
Variants and Applications -- 3 Stretching Technique -- 3.1 Basic
Scheme -- 3.2 Variants and Applications -- 4 Experimental Evaluation
-- 5 Conclusions -- References -- Multimodal Optimization by
Evolution Strategies with Repelling Subpopulations -- 1 Introduction --
2 Niching with Repelling Subpopulations -- 2.1 Core Algorithm -- 2.2
Main Niching Ideas -- 2.3 Evolution of Subpopulations -- 2.4 Restart
Strategy with Increasing Population -- 2.5 Adaptation of the
Normalized Taboo Distance -- 2.6 Boosting Time Efficiency -- 2.7
Initialization of Subpopulations -- 2.8 Parameter Setting -- 3
Numerical Evaluation -- 4 Summary and Conclusions -- References --
Two-Phase Real-Valued Multimodal Optimization with the Hill-Valley
Evolutionary Algorithm -- 1 Introduction -- 2 Framework for Two-
Phase MMO EAs -- 2.1 Initial Population Sampling -- 3 Fitness-
Informed Clustering -- 3.1 Nearest-Better Clustering -- 3.2
Hierarchical Gaussian Mixture Learning -- 3.3 Hill-Valley Clustering --
4 Core Search Algorithms -- 4.1 Termination Criteria for Core Search
Algorithms -- 5 Experiments -- 5.1 Experiment 1: Clustering
Comparison -- 5.2 Experiment 2: Core Search Algorithms and
Clustering Methods -- 5.3 Experiment 3: MMO EA Comparison -- 5.4
Experiment 4: Larger Budget -- 6 Conclusion.
References -- Probabilistic Multimodal Optimization -- 1 Introduction
-- 2 Probability Distribution-Based Niching -- 2.1 Existing Niching
Methods -- 2.2 Locality Sensitive Hashing (LSH) -- 2.3 Fast Niching --
2.4 Extensive Experiments -- 3 Probability Distribution-Based
Optimization -- 3.1 Estimation of Distribution Algorithms (EDAs) -- 3.2
Ant Colony Optimization (ACO) -- 3.3 Multimodal Estimation of
Distribution Algorithms (MEDAs) -- 3.4 Adaptive Multimodal Ant
Colony Optimization (AM-ACO) -- 3.5 Extensive Comparison -- 4
Applications -- 5 Discussion and Future Work -- 6 Conclusion --
References -- Reduced Models of Gene Regulatory Networks:
Visualising Multi-modal Landscapes -- 1 Introduction -- 2 Data-Driven
Application: Gene Regulatory Network Models -- 2.1 Introduction to
Gene Regulatory Networks and Circadian Rhythms -- 2.2 Boolean Delay
Equations -- 2.3 An Exemplar Computational Model of Circadian
Rhythms Based on BDEs -- 2.4 Parameter Optimisation of the BDE
Model -- 3 Landscape Analysis -- 4 Local Optima Networks -- 5
Discussion -- References -- Grammar-Based Multi-objective Genetic
Programming with Token Competition and Its Applications in Financial
Fraud Detection -- 1 Introduction -- 2 Background -- 2.1 Multi-
objective Optimization Problems -- 2.2 Genetic Programming (GP) --
2.3 Financial Fraud Detection -- 3 Approach -- 3.1 Grammar-Based
Multi-objective Genetic Programming (GBMGP) with Token Competition

-- 3.2 Statistical Selection Learning -- 4 Experiments and Results --
4.1 Introduction to Experiment Preparation -- 4.2 Parameter Settings
-- 4.3 Results and Analysis -- 5 Conclusion -- 5.1 Contributions --
5.2 Directions for Future Research -- References -- Phenotypic Niching
Using Quality Diversity Algorithms -- 1 Introduction -- 2 The Search
for Diversity -- 2.1 Genetic Diversity -- 2.2 Phenotypic Diversity -- 3
Quality Diversity.
3.1 First Algorithms -- 3.2 General Description -- 3.3 A Practical
Example -- 3.4 Success Stories -- 4 Insights -- 4.1 Alignment of
Quality and Diversity -- 4.2 Stepping Stones -- 4.3 Alignment of
Genome and Phenotype -- 4.4 Exploitation and Exploration -- 5
Comparing Performance -- 5.1 Performance Metrics -- 5.2 Benchmarks
-- 6 Conclusions and Open Challenges -- References.
