

1. Record Nr.	UNISA996464485503316
Titolo	Industrial networks and intelligent systems : 7th EAI International Conference, INISCOM 2021, Hanoi, Vietnam, April 22-23, 2021, proceedings // Nguyen-Son Vo, Van-Phuc Hoang, Quoc-Tuan Vien (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-77424-4
Descrizione fisica	1 online resource (518 pages)
Collana	Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering Ser. ; ; v.379
Disciplina	006.33
Soggetti	Computer networks - Industrial applications Expert systems (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Telecommunications Systems and Networks -- T4PW: TSCH in WBAN for Real-Time Monitoring of Pregnant Women -- 1 Introduction -- 2 Overview of 802.15.4e TSCH -- 2.1 TimeSlot -- 2.2 SlotFrame -- 2.3 TSCH Node Scheduling -- 2.4 Channel Hoping -- 3 Related Works -- 4 T4PW Operation -- 4.1 Data Classification -- 4.2 Measuring Frequency -- 4.3 T4PW Detail -- 5 Performance Evaluation -- 6 Conclusion -- References -- Design of a Compact and High-Efficiency 5.8GHz Microwave Power Amplifier for Wireless Communication Systems -- 1 Introduction -- 2 Impedance Matching Networks Design -- 2.1 Input Matching Network -- 2.2 Output Matching Network -- 3 Entire Circuit Evaluation -- 3.1 Small-Signal Evaluation -- 3.2 Large-Signal Evaluation -- 4 Conclusion -- References -- CLAN: A Robust Control Link for Aerial Mesh Networks in Contested Environments -- 1 Introduction -- 2 Related Work -- 3 System Model -- 4 Performance Evaluation -- 5 Conclusion -- References -- Energy-Efficient Mobility-Aware Clustering Protocol in WBASN for eHealth Applications -- 1 Introduction -- 2 Energy-Efficient Mobility-Aware Clustering Protocol in WBASN -- 2.1 Network Model -- 2.2 Energy Consumption Model --

2.3 Energy-Efficient Mobility-Aware Clustering Protocol -- 3
Performance Evaluation -- 3.1 Simulation Environment -- 3.2
Simulation Results and Discussion -- 4 Conclusion -- References --
An Optimized Pilot-Assisted Channel Estimation Method for Low-
Dispersive Channels -- 1 Introduction -- 2 Background of Conventional
Estimation in the OFDM System -- 3 Optimized Pilot Pattern for Low-
Dispersive Channel -- 4 A Case Study: Channel Estimation for DVB-
T/T2 System -- 4.1 Optimizing the Pilot Spacing -- 4.2 Performance
Evaluations -- 5 Conclusion -- References.
Performance Analysis of Mobile Edge Computing Network Applied
Uplink NOMA with RF Energy Harvesting -- 1 Introduction -- 2 System
Model -- 3 Performance Analysis -- 4 SCP Optimization Problem and
Solution -- 5 Numerical Results and Discussion -- 6 Conclusion --
References -- Popularity-Based Hierarchical Caching for Next
Generation Content Delivery Networks -- 1 Introduction -- 1.1 Our
Contribution -- 2 Related Work -- 3 Problem Description -- 4
Proposed Architecture -- 4.1 Edge Side Module -- 4.2 Calculation
Module -- 5 Numerical Evaluation -- 5.1 Test Results -- 6 Conclusion
-- References -- A Real-Time Internal Calibration Method for Radar
Systems Using Digital Phase Array Antennas -- 1 Introduction -- 2
Structure of the CalSig -- 3 Analyzing Measurement Errors
and the Impact of the CalSig on the Quality of the System -- 3.1
Analyzing Measurement Errors -- 3.2 Impact of the CalSig
on the Quality of Receiving Channels -- 4 Evaluation of the Proposed
Calibration Method by Simulation -- 5 Conclusion -- References --
Micro-motion Target Classification Based on FMCW Radar Using
Extended Residual Neural Network -- 1 Introduction -- 2 Doppler
Effect and Time-Frequency Spectrogram -- 3 Proposed Neural Network
-- 4 Experiment Results and Discussion -- 4.1 Dataset Generation --
4.2 Experiment Results -- 5 Conclusion -- References -- Hardware,
Software, and Application Designs -- Left Hand and Right Hand
Circularly Polarized Antenna for 5G Devices -- 1 Introduction -- 2 5G
LHCP and RHCP Antenna Design -- 2.1 Printed Dipole Antenna Element
-- 2.2 Proposed LHCP and RHCP Antenna -- 3 Conclusions --
References -- Examination of Investigation Method of Malware
Spreading State -- 1 Introduction -- 2 Related Works -- 2.1 Definitions
-- 2.2 Related Works -- 2.3 Communication Features of Hajime and
Mirai -- 3 Proposal Method -- 4 Experiment -- 4.1 Experiment Data.
4.2 Experimental Results -- 5 Discussion -- 6 Conclusion --
References -- Improving Power Efficiency of AESA System with GaN
Supply-Modulated Power Amplifier -- 1 Introduction -- 2 Power
Efficiency of AESA System -- 2.1 Power-Added Efficiency of AESA
System -- 2.2 Beamforming and Power Distribution -- 2.3 Operation
Range and Transmitting Power -- 3 GaN Supply-Modulated Power
Amplifier Design -- 4 Analysis Improvement Power Efficiency of AESA
System with Designed GaN SM PA -- 5 Conclusion -- References --
Smart Shoe Based on Battery-Free Bluetooth Low Energy Sensor -- 1
Introduction -- 2 System Design -- 2.1 The Proposed Smart Shoe --
2.2 Proposed Self-powered BLE Sensor -- 2.3 The Proposed
Triboelectric Energy Harvester -- 3 Device Testing -- 4 Conclusion --
References -- Highly Reliable PUFs for Embedded Systems, Protected
Against Tampering -- 1 Introduction -- 2 Use Case -- 2.1 PUF Use
Cases -- 2.2 PUF as a Master Key -- 2.3 Motivation for This Work -- 3
One Solution Based on the Loop PUF -- 3.1 The Loop PUF Rationale --
3.2 The Loop PUF Life-Cycle -- 3.3 Test of Loop PUFs -- 3.4 Resistance
to Attacks -- 4 The Loop PUF Security in Front of Side-Channel Attacks
-- 4.1 Side-Channel Attacks on the Challenge-Response Pairs -- 4.2
Power Side-Channel Attacks Without Knowing Responses -- 4.3 Side-

Channel Attacks on Error Correction -- 5 The Loop PUF Security in Front of Machine Learning Attacks -- 6 The Loop PUF Security in Front of Perturbations Attacks -- 6.1 Criticality of Perturbation Attacks -- 6.2 The Loop PUF's Perturbation Resistance -- 7 Conclusions and Perspectives -- References -- On Use of Deep Learning for Side Channel Evaluation of Black Box Hardware AES Engine -- 1 Introduction -- 2 Preliminaries -- 2.1 Side-Channel Attacks -- 2.2 Deep Learning Based SCA -- 3 Target Board and Setup -- 3.1 Leakage Model -- 4 Experimental Results.

4.1 Locating AES Activity -- 4.2 Experimental Result for Deep Learning Based SCA -- 4.3 On the Power of Detailed Profiling -- 4.4 Is Model 1 an Optimal Leakage Model -- 5 Conclusion -- References -- A New Method for Enhancing Software Effort Estimation by Using ANFIS-Based Approach -- 1 Introduction -- 2 Literature Review -- 2.1 Function Points Analysis (FPA) -- 2.2 Fuzzy Logic Membership Function -- 2.3 Anfis -- 3 The Proposed Approach -- 3.1 Approach Description -- 3.2 Dataset Description -- 3.3 ANFIS Training -- 3.4 ALBRE- Tool for Effort Estimation -- 4 Results and Discussion -- 5 Conclusion and Future Work -- References -- A New Method to Improve Quality Predicting of Software Project Completion Level -- 1 Introduction -- 2 Background -- 2.1 The Earned Value Management Method -- 2.2 Gompertz Growth Model (GGM) -- 3 Research Methodology -- 3.1 Original Method -- 3.2 Proposed Method I-GGM -- 4 Experiment and Evaluation -- 4.1 Experimental Data -- 4.2 Evaluation Criteria -- 4.3 Result of Assessment According to MAPE -- 5 Conclusions -- References -- An Embedded Digital Multi-channel Analyzer for Radiation Detection Based on FPGA -- 1 Introduction -- 1.1 The Development of Digital Pulse Processing -- 1.2 Reconfigurable Hardware-Based Approaches for DMCA Accelerators -- 2 Background -- 3 DMCA Function Design and Verification -- 3.1 The Analytical Model of DMCA -- 3.2 Design the DMCA Model on MATLAB-Simulink -- 4 Design of DMCA System -- 4.1 The Structural Design of the DMCA System -- 4.2 Scintillation Detector and the Analog Frontend -- 4.3 Pulse Processing System Design -- 4.4 FPGA Implementation and Experimental Results -- 5 Conclusion -- References -- A Design of CMOS PUF Based on Ring Oscillator and Time-to-Digital Converter -- 1 Introduction -- 2 Conventional RO Based PUF Designs and Related Works -- 3 Proposed TDC Based RO PUF.

4 Implementation Results -- 5 Conclusion -- References -- Information Processing and Data Analysis -- A Bufferless Non-exact Matching Hardware Accelerator for Processing Large Non-uniform Stream Data -- 1 Introduction -- 2 Hardware Design of Data Searching Accelerator -- 2.1 The Data Matching Problem -- 2.2 The Architecture of the Design -- 3 Design Evaluation on FPGA -- 3.1 Evaluation on the Impact of Parameters Related to the Input Data Structure -- 3.2 Evaluation on the Impact of Parameters Related to the Design Architecture -- 3.3 Performance Evaluation -- 3.4 The Multilayer Optimizing Solutions to Improve the Overall Performance of the Searching System -- 4 The Practical Verification of the Matching Core -- 5 Conclusion -- References -- A New User Recommendation Model Within the Context of the Covid-19 Pandemic -- 1 Introduction -- 2 Meetup Event Analysis -- 2.1 Text Factor -- 2.2 Time Factor -- 2.3 Location Factor -- 3 Recommendation Model -- 4 Empirical Study -- 4.1 Setup -- 4.2 Baseline Methods -- 4.3 Evaluation Metrics -- 4.4 Experimental Results -- 5 Related Work -- 6 Conclusions and Future Work -- References -- Enhancing the Capacity of Detecting and Classifying Cavitation Noise Generated from Propeller Using the Convolution Neural Network -- 1 Introduction -- 2 Pre-processing

by Modified DEMON -- 3 CNN Comparison -- 4 Conclusion --
References -- A Feature-Augmented Deep Learning Model for
Extractive Summarization -- 1 Introduction -- 2 Related Work -- 3
Proposed Approach -- 3.1 Baseline Model -- 3.2 Proposed Model --
3.3 Word-Based Features -- 3.4 Sentence-Based Features -- 4
Experimentation -- 4.1 Dataset -- 4.2 Empirical Settings -- 4.3
Experimental Results -- 5 Conclusion -- References -- Proposing
Chatbot Model for Managing Comments in Vietnam -- 1 Introduction
-- 2 Proposal Algorithm -- 2.1 Theoretical Basis -- 2.2 Database
Design.
3 Simulation and Results.
