1. Record Nr. UNISA996464539903316

Titolo	Pervasive computing technologies for healthcare : 15th EAI International Conference, Pervasive Health 2021, virtual event, December 6-8, 2021, proceedings / / edited by Hadas Lewy, Refael Barkan
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-99194-6
Descrizione fisica	1 online resource (574 pages)
Collana	Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering ; ; v.431
Disciplina	610.2854
Soggetti	Medical care - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- AI for COVID-19 Treatment in Hospitals and Community Care -- Clinical Decision Making and Outcome Prediction for COVID-19 Patients Using Machine Learning -- 1 Introduction -- 2 Materials and Methods -- 3 Results -- 3.1 Experiments -- 3.2 Results -- 4 Discussion -- 5 Conclusions -- References -- Building a Tool that Draws from the Collective Wisdom of the Internet to Help Users Respond Effectively to Anxiety-Related Questions -- 1 Introduction -- 1.1 Questions and Answers on Online Mental Health Communities -- 1.2 Accessing Collective Wisdom from Mental Health Subreddits -- 1.3 Project Summary -- 2 Creating the Helper Tool -- 2.1 Part 1: Creating a Machine Learning Classifier to Predict Response Quality -- 2.2 Part 2: Developing and Testing a Question-Answering System -- 2.3 Part 3: Developing a System to Suggest Online Resources for Anxiety-Related Question -- 2.4 Part 4: Designing and Implementing the Helper Tool -- 2.5 Data Availability -- 3 Discussion -- References -- Technologies Implementation, Acceptance and Evaluation During the Pandemic -- Aspects of Pervasive Health and Technology Use in Care Organizations During the Pandemic: Report from a Municipality Covid-19 Study -- 1 Introduction -- 2 Background and Case -- 3 Method -- 4 Related Work -- 5 Empirical Data: Survey -- 6 Empirical Data: Workshop -- 7

Discussion -- 8 Conclusion -- References -- Acceptance Evaluation of a COVID-19 Home Health Service Delivery Relational Agent -- 1 Introduction -- 2 Proposed System -- 2.1 Design Process -- 2.2 Interactive Prototype -- 3 Preliminary Evaluation -- 3.1 Study Design -- 3.2 Participants -- 3.3 Measures and Data Analysis -- 3.4 Findings -- 4 Limitations -- 5 Discussion -- 6 Conclusion -- References.
The Impact of COVID-19 on LGBTQIA+Individuals' Technology Use to Seek Health Information and Services -- 1 Introduction -- 2 Background -- 3 Methodology -- 3.1 Data Collection -- 3.2 Data Analysis -- 4 Findings -- 4.1 Demographics -- 4.2 A Comparison of Perceived Health Conditions Between LGBTQIA+participants and General Population in the United States -- 4.3 Health Information Seeking -- 4.4 Health Care Accessibility -- 4.5 Recommendations for Improving Healthcare Experiences During Pandemic -- 5 Discussion -- 6 Conclusion -- References -- Remote Monitoring -- Detecting Bed Occupancy Using Thermal Sensing Technology: A Feasibility Study -- 1 Introduction -- 2 Related Work -- 3 Materials and Methods -- 3.1 Thermopile Array Sensor Setup -- 3.2 Data Collection -- 3.3 Data Pre-processing -- 3.4 Data Labelling -- 3.5 Background Subtraction -- 3.6 Blob Detection and Tracking -- 3.7 Region of Interest Identification -- 3.8 Logical Reasoning -- 3.9 Bed Occupancy Detection -- 4 Results -- 4.1 Bed Occupancy Detection -- 4.2 Bed Occupancy Duration -- 5 Discussion -- 5.1 Limitations -- 6 Conclusions -- References -- Sensor-Based Measurement of Nociceptive Pain: An Exploratory Study with Healthy Subjects -- 1 Introduction -- 2 Methods -- 2.1 Study Subjects -- 2.2 Data Collection -- 2.3 Data Analysis -- 3 Results -- 3.1 Self-assessed Pain -- 3.2 Sensor-Based Measures of Pain -- 4 Discussion and Conclusion -- References -- Dynamics Reconstruction of Remote Photoplethysmography -- 1 Introduction -- 2 Related Works -- 2.1 rPPG Extraction Methods -- 2.2 Dataset Used for rPPG Testing -- 3 rPPG Extraction Method -- 3.1 Region of Interest Selection -- 3.2 Signal Extraction -- 3.3 Signal Postprocessing -- 4 Chaotic Dynamics Analysis of PPG and rPPG -- 4.1 PPG and rPPG Signals -- 4.2 Phase Space Reconstruction -- 4.3 Lyapunov Exponent -- 4.4 Correlation Dimension.
4.5 Approximate Entropy -- 5 Results -- 6 Conclusion -- References -- Remote Care -- Iris: A Low-Cost Telemedicine Robot to Support Healthcare Safety and Equity During a Pandemic -- 1 Introduction -- 2 Background -- 3 Designing Telepresence Robots for Overwhelmed HCWs -- 3.1 Design Requirements -- 3.2 Software and Hardware Requirements -- 4 Implementation -- 5 Evaluation -- 6 Results -- 6.1 Situating Robots in the ED -- 6.2 Integrating Robots Within HCW's Existing Workflow -- 6.3 Robots Supporting HCWs' Ability to Evaluate Patients -- 6.4 Physical Interaction Is Important -- 6.5 Physicians' Perspectives on Patient Experience -- 6.6 Use Cases Ideated by Participants -- 6.7 Iris-Specific Feedback -- 7 Discussion -- 7.1 Design Recommendations -- 7.2 Implications for Health Equity -- 7.3 Limitations and Future Work -- References -- Wireless Sensor Networks for Telerehabilitation of Parkinson's Disease Using Rhythmic Auditory Stimulation -- 1 Introduction -- 2 Related Work -- 2.1 Telerehabilitation -- 2.2 Rhythmic Auditory Stimulation -- 2.3 System Design for Telerehabilitation -- 3 System Design -- 3.1 Sensor Node -- 3.2 Bluetooth Module and Communication -- 3.3 Base Station Node -- 3.4 Server -- 4 Testing -- 4.1 Sensor Node -- 4.2 Base Station Node -- 4.3 Server Node -- 4.4 Integrated Testing -- 5 Results and Discussion -- 5.1 Sensor Node Tests -- 5.2 Base Station Node Test -- 5.3 Server Tests -- 5.4 No Load Test -- 5.5 Correct Step Test -- 5.6 System Functionality -- 6 Conclusion -- References -- ``We're Not Meant to

Deal with Crisis for a Year": Supporting Frontline Healthcare Providers' Wellness During a Pandemic -- 1 Introduction -- 2 Related Work -- 3 Methods -- 3.1 Study Participants -- 3.2 Data Collection and Analysis -- 4 Findings -- 4.1 Challenges for HCPs Integrating Technology into Daily Life -- 4.2 Capturing Emotional Burden.
4.3 HCPs' Approach to Emotional Well-Being -- 5 Discussion -- 5.1 Automation and Context-Sensing -- 5.2 Deployment of Micro-interventions -- 5.3 Explore Alternative Paths for Measurements -- 6 Study Limitations -- 7 Conclusion -- References -- Therapist-Informed Design Directions for Mobile Assistive Technologies for Anxiety -- 1 Introduction -- 2 Background and Related Work -- 2.1 Design Approaches for Anxiety Mobile Assistive Technologies -- 2.2 Underexplored Design Directions -- 3 Method -- 3.1 Participants -- 3.2 Data Collection -- 3.3 Analysis -- 4 Results and Discussions -- 4.1 Supporting a Variety of Effective Treatment Components -- 4.2 Anxiety Condition Specific Customizations of Interventions -- 4.3 A Conceptual Framework for Regular Phases of Anxiety -- 4.4 Anxiety Phases Based Customizations of Interventions -- 4.5 Design Directions Motivated by Current Challenges -- 5 Limitations and Future Work -- 6 Conclusion -- References -- Queering E-Therapy: Considerations for the Delivery of Virtual Reality Based Mental Health Solutions with LGBTQ2IA+ Communities -- 1 Introduction -- 2 Related Work -- 2.1 HCI and VR Considerations for the Queer Community -- 2.2 VR for Digital Mental Health -- 3 Study Methodology -- 3.1 Data Collection and Analysis -- 3.2 Participants and Recruitment -- 4 Findings -- 4.1 Descriptive Information on Mental Health Services -- 4.2 Experiences with Digital Mental Health Services -- 4.3 Impressions and Considerations for the Use of VR as a Tool for Digital Mental Health Services -- 5 Discussion -- 5.1 Considerations for Improved Experiences with Digital Mental Health Tools -- 5.2 Considerations for Clinical VR as a Tool for Digital Mental Health -- 6 Limitations and Future Work -- 7 Conclusion -- References -- FatigueSet: A Multi-modal Dataset for Modeling Mental Fatigue and Fatigability -- 1 Introduction.
2 Background and Related Work -- 2.1 Defining Fatigue -- 2.2 Operationalizing Fatigue for Fatigue Management Technologies -- 2.3 Types of Fatigue -- 2.4 Datasets for Fatigue Detection -- 3 Methodology -- 3.1 Study Design -- 3.2 Physical Activity Protocol -- 3.3 Inducing Mental Fatigue -- 3.4 Fatigue and Fatigability Measurements -- 3.5 Physiological Measurements -- 4 Preliminary Results -- 4.1 Fatigue and Fatigability Measurements -- 4.2 Effect of Physical Activity on Fatigue and Fatigability -- 5 Conclusion -- References -- Exploring Unique App Signature of the Depressed and Non-depressed Through Their Fingerprints on Apps -- 1 Introduction -- 2 Related Work -- 2.1 Difference in Smartphone Usage Among Various Groups of People -- 2.2 Smartphone Usage and Mental Health -- 2.3 Re-identification of the Users and Privacy Leakage -- 3 Methodology -- 3.1 Data Collection Tool -- 3.2 Data Collection Procedure and Participants -- 3.3 Data Analysis -- 3.4 Research Ethics -- 4 Results -- 4.1 Uniqueness While Considering Apps of All Categories -- 4.2 Uniqueness Through App Categories -- 4.3 Difference in Uniqueness Between the Depressed and Non-depressed Students -- 5 Discussion -- 5.1 Depressed and Non-depressed Students Can Be Uniquely Re-identified -- 5.2 Depressed Students Are More Unique in Some App Categories -- 6 Limitations -- 7 Conclusion -- References -- A Serious Game for Nutritional Education of Children and Adolescents with Neurodevelopmental Disorders -- 1 Introduction -- 1.1 Background and Significance -- 1.2 Related Works -- 2 The Serious Game "Captain Chomp and the Great FoodAdventure" -- 2.1

Design -- 2.2 Development -- 3 Protocol of the Pilot Study -- 4 Conclusions -- References -- Elderly Care and Technologies -- Designing Conversational Assistants to Support Older Adults' Personal Health Record Access -- 1 Introduction -- 2 Related Work. 3 MIHA: A Health-Related Question Answering Prototype.
