Titolo	Climate Strategy : between ambition and realism // WRR Scientific Council for Government Policy [[electronic resource]]
Pubbl/distr/stampa	Amsterdam : , : Amsterdam University Press, , 2007
ISBN	1-281-78767-1 9786611787677 90-485-0109-1
Descrizione fisica	1 online resource (95 pages) : digital, PDF file(s)
Collana	WRR webpublications ; ; 14
Disciplina	363.73874
Soggetti	Climatic Changes Global Warming
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Feb 2021).
Nota di bibliografia	Includes bibliographical references (p. 93-95).
Nota di contenuto	Frontmatter -- Preface / Donk, Wim B.H.J. van de -- Contents -- Summary -- 1. Introduction -- 2. Problem definition and policy -- 3. Adapting to a changing climate -- 4. Emission reduction as a technical strategic issue -- 5. International coordination of climate policy -- 6. A Dutch and European climate strategy -- Bibliography
Sommario/riassunto	According to the UN-sponsored Intergovernmental Panel on Climate Change, current global changes in climate are 90-95% likely to have been caused, at least in part, by human activity. This challenging analysis of the current global climate struggle suggests three courses of necessary action for solving the climate problem and demonstrates their viability: adaptation to the changed climate, selection of worldwide strategies for mitigation until 2050, and an internationally coordinated effort to implement these policies. A highly readable and accessible addition to climate strategy and policy, this volume provides a refreshingly innovative look at current global climate initiatives.
