

1. Record Nr.	UNISA996465270503316
Titolo	Camera obscura, camera lucida : essays in honor of Annette Michelson // edited by Richard Allen and Malcolm Turvey [[electronic resource]]
Pubbl/distr/stampa	Amsterdam : , : Amsterdam University Press, , 2003
ISBN	1-280-91948-5 9786610919482 90-485-0506-2 0-585-49531-9
Descrizione fisica	1 online resource (294 pages) : digital, PDF file(s)
Collana	Film culture in transition
Disciplina	791.43
Soggetti	Motion pictures Modernism (Art) Art and motion pictures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Feb 2021).
Nota di bibliografia	Includes bibliographical references (p. [275]-282) and index.
Nota di contenuto	Front matter -- Contents -- Acknowledgements -- Preface / Krauss, Rosalind -- Introduction / Turvey, Malcolm -- The Logic Of An Illusion Notes On The Genealogy Of Intellectual Cinema / Iampolski, Mikhail -- Narcissistic Machines And Erotic Prostheses / Weiss, Allen S. -- Loïe Fuller And The Art Of Motion Body, Light, Electricity, And The Origins Of Cinema / Gunning, Tom -- Visitings Of Awful Promise The Cinema Seen From Etna / Liebman, Stuart -- Transfiguring The Urban Gray László Moholy-Nagy's Film Scenario 'Dynamic Of The Metropolis' / Dimendberg, Edward -- Eisenstein's Philosophy Of Film / Carroll, Noël -- Knight's Moves / Wollen, Peter -- Hitchcock And Narrative Suspense Theory And Practice / Allen, Richard -- From The Air A Genealogy Of Antonioni's Modernism / Steimatsky, Noa -- Dr. Strangelove Or: The Apparatus Of Nuclear Warfare / Simon, William G. -- Collection And Recollection On Film Itineraries And Museum Walks / Bruno, Giuliana -- Afterward: A Matter Of Time Analog Versus Digital, The Perennial Question Of Shifting Technology And Its Implications For An Experimental Filmmaker's Odyssey / Mangolte, Babette -- Select Bibliography -- List Of Contributors -- Index

Sommario/riassunto

Annette Michelson's contributions to art and film criticism over the last three decades have been unparalleled. This volume honors her unique legacy with original essays by some of the many scholars who have been influenced by her work. Some continue her efforts to develop theoretical frameworks for understanding modernist art, while others practice her form of interdisciplinary criticism in relation to avant-garde and modernist art works and artists. Still others investigate and evaluate Michelson's work itself. All in some way pay homage to her extraordinary contribution.

Nota di contenuto	<p>Introduction,.. Part 1 Current and traditional root analysis of the learning process,.. What is the training all about? Lesson learned from Japanese culture,.. Training of the trainers -- The anatomy of education and learning process -- The progress of education and learning process through years -- The light of science and knowledge never fades away -- Part 2 Ethics and metacognition of education learning and career development -- Career development in neurosurgery -- Metacognition of learning -- Ethics of learning and teaching -- Ethics of clinical research -- Utilitarianism and consequentialism in learning and career development -- Values Based Medicine (VsBM); Trainee is the center of the training process -- Part 3 Obstacles, difficulties and setbacks in learning and career development process -- Women in neurosurgery an inspiring story -- Cross borders learning and career development -- Difficult trainee! -- Difficult teacher! -- Learning from errors -- Dreams and realities- Challenges of Low-income countries -- "Surgical Training for Developing Countries: Challenges and Opportunities." -- Part 4 Learning in the digital area -- Hybrid learning in neurosurgery -- The modern teaching learning and training tools (Simulation, research...) -- Artificial intelligence in neurosurgery -- Intelligent operating room -- Distance learning, CME and on job training -- Examination, evaluation and certification in digital area -- Part 5 Mentorship -- Who is the mentor? Quality, obligation and continues self-training -- Who needs a mentor? How to choose the mentor?.</p>
Sommario/riassunto	<p>The neurosurgical, surgical and medical training and practice models have to keep up with the technological revolution in the 21st Century as our lives changed on a swift base. Making bioethics and metacognition a cornerstone in medical education and practice will flourish our humane societies. Metacognition is thinking about one's thinking, to plan, monitor and assess one's understanding and performance. By adherence to medical ethics and Values-Based Medicine (VsBM) as guiding principles, we can develop benevolent medical practice. To enhance knowledge application, skills, and character qualities in realms beyond the immediate context in which they were learned. In this book, we developed a framework on how to evolve medical education and training by utilizing hi-tech. We divided the book into five principal components; Current and traditional root analysis of the learning process, Ethics and metacognition of education, learning and career development, Obstacles, difficulties and setbacks in learning and career development process, Learning in the digital era, and Mentorship. The author believes we are entering a new era of information technology, which will have a significant impact on the education, sciences, strategies and philosophy. Therefore, in preparation for this colossal transformation, the author brings together the best brains in the neurosurgical field from around the globe. Twenty distinguished Professors of Neurosurgery and educators from Canada, the USA, Colombia, the UK, Italy, the Netherland, India, Japan, China, Rwanda, Egypt and Saudi Arabia gathered their experiences and thoughts in this book to shade light on an evolving world that will be the norm in near future.</p>
