1. Record Nr.   UNISA996465290903316

   Titolo   Computer Safety, Reliability, and Security [[electronic resource]] : 35th
                         International Conference, SAFECOMP 2016, Trondheim, Norway,
                         September 21-23, 2016, Proceedings / / edited by Amund Skavhaug,
                         Jérémie Guiochet, Friedemann Bitsch

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                         2016

   ISBN   3-319-45477-3

   Edizione   [1st ed. 2016.]

   Descrizione fisica   1 online resource (XV, 324 p. 105 illus.)

   Collana   Programming and Software Engineering ; ; 9922

   Disciplina   005.8

   Soggetti   Computer logic
                         Programming languages (Electronic computers)
                         Software engineering
                         Computer security
                         Application software
                         Computer organization
                         Logics and Meanings of Programs
                         Programming Languages, Compilers, Interpreters
                         Software Engineering
                         Systems and Data Security
                         Computer Applications
                         Computer Systems Organization and Communication Networks

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Includes index.

   Sommario/riassunto   This book constitutes the refereed proceedings of the 35th
                         International Conference on Computer Safety, Reliability, and Security,
                         SAFECOMP 2016, held in Trondheim, Norway, in September 2016. The
                         24 revised full papers presented were carefully reviewed and selected
                         from 71 submissions. The papers are organized in topical sections on
                         fault injection, safety assurance, formal verification, automotive,
                         anomaly detection and resilience, cyber security, fault trees, and safety

analysis.
