1. Record Nr.   UNISA996465299603316

   Titolo   Graphical Models for Security [[electronic resource]] : 4th International Workshop, GraMSec 2017, Santa Barbara, CA, USA, August 21, 2017, Revised Selected Papers / / edited by Peng Liu, Sjouke Mauw, Ketil Stolen

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018

   ISBN   3-319-74860-2

   Edizione   [1st ed. 2018.]

   Descrizione fisica   1 online resource (XI, 147 p. 48 illus.)

   Collana   Security and Cryptology ; ; 10744

   Disciplina   005.8

   Soggetti   Computer security
                         Computer programming
                         Software engineering
                         Artificial intelligence
                         Computers
                         Computer organization
                         Systems and Data Security
                         Programming Techniques
                         Software Engineering
                         Artificial Intelligence
                         Computing Milieux
                         Computer Systems Organization and Communication Networks

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Nota di contenuto   Graphical modeling of Security Arguments: Current State and Future Directions -- Evil Twins: Handling Repetitions in Attack - Defense Trees - A Survival Guide -- Visualizing Cyber Security Risks with Bow-Tie Diagrams -- CSIRA: A method for analysing the risk of cybersecurity incidents -- Quantitative Evaluation of Attack Defense Trees using Stochastic Timed Automata -- Probabilistic Modeling of Insider Threat Detection Systems -- Security Modeling for Embedded System Design -- Circle of Health Based Access Control for Personal Health

Information Systems -- New Directions in Attack Tree Research: Catching up with Industrial Needs -- Employing Graphical Risk Models to Facilitate Cyber-Risk Monitoring - the WISER Approach.

Sommario/riassunto   This book constitutes revised selected papers from the 4th International Workshop on Graphical Models for Security, GraMSec 2017, held in Santa Barbara, CA, USA, in August 2017. The 5 full and 4 short papers presented in this volume were carefully reviewed and selected from 19 submissions. The book also contains one invited paper from the WISER project. The contributions deal with the latest research and developments on graphical models for security.
