1.	Record Nr.	UNISA996465306203316
	Titolo	Decision and Game Theory for Security [[electronic resource]] : 8th International Conference, GameSec 2017, Vienna, Austria, October 23-25, 2017, Proceedings / / edited by Stefan Rass, Bo An, Christopher Kiekintveld, Fei Fang, Stefan Schauer
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
	ISBN	3-319-68711-5
	Edizione	[1st ed. 2017.]
	Descrizione fisica	1 online resource (XI, 534 p. 137 illus.)
	Collana	Security and Cryptology ; ; 10575
	Disciplina	004
	Soggetti	Computer security
		Application software
		Computer communication systems
		Algorithms
		Management information systems
		Computer science
		Game theory
		Systems and Data Security
		Information Systems Applications (incl. Internet)
		Computer Communication Networks
		Algorithm Analysis and Problem Complexity
		Management of Computing and Information Systems
		Game Theory, Economics, Social and Behav. Sciences
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Game theory and mechanism design for security and privacy -- Pricing and economic incentives for building dependable and secure systems -- Dynamic control, learning, and optimization and approximation techniques -- Decision making and decision theory for cybersecurity and security requirements engineering -- Socio-technological and behavioral approaches to security -- Risk assessment and risk management -- Security investment and cyber insurance -- Security

and privacy for the Internet-of-Things (IoT), cyber-physical systems, resilient control systems -- New approaches for security and privacy in cloud computing and for critical infrastructure -- Security and privacy of wireless and mobile communications, including user location privacy -- Game theory for intrusion detection -- Empirical and experimental studies with game-theoretic or optimization analysis for security and privacy.

Sommario/riassunto	This book constitutes the refereed proceedings of the 8th International Conference on Decision and Game Theory for Security, GameSec 2017, held in Vienna, Austria, in October 2017. The 24 revised full papers presented together with 4 short papers were carefully reviewed and selected from 71 submissions. The papers address topics such as Game theory and mechanism design for security and privacy; Pricing and economic incentives for building dependable and secure systems; Dynamic control, learning, and optimization and approximation techniques; Decision making and decision theory for cybersecurity and security requirements engineering; Socio-technological and behavioral approaches to security; Risk assessment and risk management; Security investment and cyber insurance; Security and privacy for the Internet-of-Things (IoT), cyber-physical systems, resilient control systems; New approaches for security and privacy in cloud computing and for critical infrastructure; Security and privacy of wireless and mobile communications, including user location privacy; Game theory for intrusion detection; and Empirical and experimental studies with game-theoretic or optimization analysis for security and privacy.
