

1. Record Nr.	UNISA996465306403316
Titolo	Automata, Languages and Programming [[electronic resource]] : Fifth Colloquium, Udine, Italy, July 17 - 21, 1978. Proceedings // edited by G. Ausiello, C. Böhm
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1978
ISBN	3-540-35807-2
Edizione	[1st ed. 1978.]
Descrizione fisica	1 online resource (X, 510 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 62
Disciplina	511.3
Soggetti	Mathematical logic Computer science Computers Mathematical Logic and Foundations Computer Science, general Theory of Computation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Simple EOL forms under uniform interpretation generating CF languages -- Codes : Unequal probabilities, unequal letter costs -- Sur l'inversion des morphismes d'arbres -- Grammars with dynamic control sets -- Ambiguité forte -- Relationship between density and deterministic complexity of MP-complete languages -- Stable models of typed λ -calculus -- Path measures of turing machine computations -- Une famille remarquable de codes indecomposables -- Comparisons and reset machines -- Size — Depth tradeoff in boolean formulas -- (Semi)-separability of finite sets of terms in Scott's D -models of the λ -calculus -- Mutual exclusion of N processors using an $O(N)$ -valued message variable -- On the power of self-application and higher type recursion -- Time and space bounds for selection problems -- Stepwise specification and implementation of abstract data types -- The complexity of equivalence and containment for free single variable program schemes -- On improving the worst case running time of the Boyer-Moore string matching algorithm -- Semantics and correctness

of nondeterministic flowchart programs with recursive procedures --
Arithmetical completeness in logics of programs -- Covering a graph
by circuits -- A pspace complete problem related to a pebble game --
Some effective results about linear recursive sequences -- On the
parsing and covering of simple chain grammars -- Sur un cas
particulier de la conjecture de Cerny -- States can sometimes do more
than stack symbols in PDA's -- Some decision results for recognizable
sets in arbitrary monoids -- Sur les series rationnelles en variables non
commutatives -- On constructing efficient evaluators for attribute
grammars -- Une extension de la theorie des types en λ -calcul --
Parallel and nondeterministic time complexity classes -- Multiterminal
network flow and connectivity in unsymmetrical networks --
Admissible coherent c.p.o.'s -- Integration of the phase-difference
relations in asynchronous sequential networks -- Self-modifying nets,
a natural extension of Petri nets -- Head recurrent terms in
combinatory logic : A generalization of the notion of head normal form
-- Characterization problems in the theory of inductive inference.
