   Sommario/riassunto   This book constitutes the proceedings of the 18th International
                        Conference on Cryptographic Hardware and Embedded Systems, CHES
                        2016, held in Santa Barbara, CA, USA, in August 2016. The 30 full
                        papers presented in this volume were carefully reviewed and selected
                        from 148 submissions. They were organized in topical sections named:
                        side channel analysis; automotive security; invasive attacks; side

channel countermeasures; new directions; software implementations; cache attacks; physical unclonable functions; hardware implementations; and fault attacks.
