Sommario/riassunto	This book has been designed according to the syllabus of Bangalore University. Each unit of syllabus has been presented to the students and the teachers in a lucid and simple manner. The objective of this book is to serve as a text book for courses in Research Methodology in social sciences and also to serve as a hand book for research scholars. The book is organised in six chapters. Each chapter takes the reader to the detailed study of the contents. At the end of the book skill development exercises are also presented. This would definitely takes the students community to get an insight into

Nota di contenuto	Intelligentized technologies for robotic welding -- Advanced welding robot technologies -- Programming and simulation of welding robots -- Vision guiding and tracking technologies of welding robots -- Quality control of robotic welding -- Tele-control and network technologies for robotic welding -- Sensing technologies for welding process -- Robotic welding under special environment --

Intelligentized and digital welding equipments -- Intelligentized technologies for industrial process.

Sommario/riassunto

The primary aim of this volume is to provide researchers and engineers from both academic and industry with up-to-date coverage of new results in the field of robotic welding, intelligent systems and automation. The book is mainly based on papers selected from the 2019 International Workshop on Intelligentized Welding Manufacturing (IWIWM'2019) in USA. The articles show that the intelligentized welding manufacturing (IWM) is becoming an inevitable trend with the intelligentized robotic welding as the key technology. The volume is divided into four logical parts: Intelligent Techniques for Robotic Welding, Sensing of Arc Welding Processing, Modeling and Intelligent Control of Welding Processing, as well as Intelligent Control and its Applications in Engineering.
