

1. Record Nr.	UNICAMPANIASUN0006806
Autore	De Tilla, Maurizio
Titolo	Le locazioni nella prassi giudiziaria / Maurizio De Tilla
Pubbl/distr/stampa	Milano : Giuffrè
Descrizione fisica	v. ; 25 cm.
Disciplina	346.45043402648
Soggetti	Locazione - Giurisprudenza
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNISA996465476503316
Autore	Schneider Markus
Titolo	Spatial Data Types for Database Systems [[electronic resource] ] : Finite Resolution Geometry for Geographic Information Systems / / by Markus Schneider
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1997
ISBN	3-540-69551-6
Edizione	[1st ed. 1997.]
Descrizione fisica	1 online resource (XV, 281 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 1288
Disciplina	910/.285/573
Soggetti	Signal processing Image processing Speech processing systems Optical data processing Database management Geographical information systems Data structures (Computer science) Application software Signal, Image and Speech Processing Image Processing and Computer Vision Database Management Geographical Information Systems/Cartography Data Structures Information Systems Applications (incl. Internet)

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Spatial data types — A survey -- Realms: A foundation for spatial data types in database systems -- Realm-based spatial data types: The ROSE algebra -- Efficient algorithms for realm-based spatial data types -- Implementing concepts: Realm system and ROSE system -- Conclusions, open problems, and future work.
Sommario/riassunto	Database research in the last decade has increasingly focused on providing support for non-standard applications. One important domain is representation and processing of spatial information, needed, e.g., in geographical information systems. Spatial data types provide a fundamental abstraction for modeling the structure of geometric entities, their relationships, properties and operations. This monograph is an extensive survey of this field and introduces a new, general, sophisticated framework for the formal definition and robust implementation of spatial data types.

3. Record Nr.	UNINA990004875340403321
Autore	De Quincey, Thomas <1785-1859>
Titolo	Selection / Thomas de Quincey ; with essays by Leslie Stephen and Francis Thompson ; with an introduction and notes by M.R. Ridley
Pubbl/distr/stampa	Oxford, : The Clarendon Press, 1927
Descrizione fisica	XVI, 195 p. ; 19 cm
Locazione	FLFBC
Collocazione	N 173 (1)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
