

1. Record Nr.	UNISA996465519203316
Titolo	Progress in Artificial Intelligence [[electronic resource] ] : 8th Portuguese Conference on Artificial Intelligence, EPIA '97, Coimbra, Portugal, October 6-9, 1997. Proceedings // edited by Ernesto Costa, Amilcar Cardoso
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1997
ISBN	3-540-69605-9
Edizione	[1st ed. 1997.]
Descrizione fisica	1 online resource (XIV, 402 p.)
Collana	Lecture Notes in Artificial Intelligence ; ; 1323
Disciplina	006.3/3
Soggetti	Artificial intelligence Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Flexible proof-replay with heuristics -- Flexible re-enactment of proofs -- Inference rights for controlling search in generating theorem provers -- A retrieval method for exploration of a case memory -- Incremental concept evolution based on adaptive feature weighting -- A 0–1 quadratic knapsack problem for modelizing and solving the constraint satisfaction problems -- An algorithm for solving systems of linear diophantine equations in naturals -- GenSAT: A navigational approach -- Timetabling using demand profiles -- Intelligent VR training -- Training strategies and knowledge acquisition: Using the same reflective tools for different purposes -- About the intended meaning of a linguistic negation -- Integration of inheritance in SNePS -- Measures of uncertainty and independence concept in different calculi -- A Multi-agent approach to first-order logic -- Modelling dynamic aspects of intentions -- Multi-agent negotiation algorithms for resources cost estimation: A case study -- Parla: A cooperation language for cognitive multi-agent systems -- Vivid agents arguing about distributed extended logic programs -- Approximate reasoning -- New results about sub-admissibility for general families of heuristic search algorithms -- Fixed point classification method for qualitative simulation -- Contextual logic of change and the ramification problem

-- Temporal reasoning about actor programs -- A CLP model to the job sequencing problem -- A new approach for extracting rules from a trained neural network -- Bayesian networks, rule induction and logistic regression in the prediction of women survival suffering from breast cancer -- Controlling for unexpected goals when planning in a mixed-initiative setting -- Cooperative memory structures and commonsense knowledge for planning -- Diagonalization and type rewriting in clam -- Granularity for explanation -- Object model of intelligent tutoring shell -- Resource allocation on agent meta-societies -- Diagnostic information at your fingertips! -- Reasoning about actions with abductive logic programming -- Dimensions of embodiments: Possible futures for cognitive science (Abstract) -- Machine learning meets natural language (Abstract).

---

Sommario/riassunto

This book constitutes the refereed proceedings of the 8th Portuguese Conference on Artificial Intelligence, EPIA '97, held in Coimbra, Portugal, in October 1997. The volume presents 24 revised full papers and 9 revised posters selected from 74 submissions from various countries. Also included are two full invited papers and two abstracts of invited talks. The papers are organized in topical sections on automated reasoning and theorem proving; CBR and machine learning; constraints; intelligent tutoring; knowledge representation; multi-agent systems and DAI; nonmonotonic, qualitative and temporal reasoning, and problem solving.
