

1. Record Nr.	UNISA996465528803316
Titolo	Lectures on Logic and Computation [[electronic resource]] : ESSLLI 2010, Copenhagen, Denmark, August 2010, ESSLLI 2011, Ljubljana, Slovenia, August 2011, Selected Lecture Notes // edited by Nick Bezhanishvili, Valentin Goranko
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2012
ISBN	3-642-31485-6
Edizione	[1st ed. 2012.]
Descrizione fisica	1 online resource (VIII, 265 p. 41 illus.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 7388
Disciplina	005.1015113
Soggetti	Computer science Algorithms Machine theory Mathematical logic Computer science—Mathematics Discrete mathematics Artificial intelligence Computer Science Logic and Foundations of Programming Formal Languages and Automata Theory Mathematical Logic and Foundations Discrete Mathematics in Computer Science Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and author index.
Sommario/riassunto	The European Summer School in Logic, Language and Information (ESSLLI) is organized every year by the Association for Logic, Language and Information (FoLLI) in different sites around Europe. The main focus of ESSLLI is on the interface between linguistics, logic and computation. ESSLLI offers foundational, introductory and advanced courses, as well as workshops, covering a wide variety of topics within the three areas of interest: Language and Computation, Language and

Logic, and Logic and Computation. During two weeks, around 50 courses and 10 workshops are offered to the attendants, each of 1.5 hours per day during a five days week, with up to seven parallel sessions. ESSLLI also includes a student session (papers and posters by students only, 1.5 hour per day during the two weeks) and four evening lectures by senior scientists in the covered areas. The 6 course notes were carefully reviewed and selected. The papers are organized in topical sections on computational complexity, multi-agent systems, natural language processing, strategies in games and formal semantics.
