Sommario/riassunto

More than half of children either in foster care, or adopted from care in the developed world, have a measurable need for mental health services, while up to one quarter present with complex and severe trauma- and attachment-related psychological disorders. This book outlines how services can effectively detect, prevent, and treat mental health difficulties in this vulnerable population.Responding to increasing evidence that standard child and adolescent mental health services are poorly matched to the mental health service needs of children and young people who have been in foster care, this

Sommario/riassunto

This book constitutes the refereed proceedings of the 6th International Joint Conference on Automated Reasoning, IJCAR 2012, held in Manchester, UK, in June 2012. IJCAR 2012 is a merger of leading events in automated reasoning, namely CADE (International Conference on Automated Deduction), FroCoS (International Symposium on Frontiers of Combining Systems), FTP (International Workshop on First-Order Theorem Proving), and TABLEAUX (International Conference on Automated Reasoning with Analytic Tableaux and Related Methods). The 32 revised full research papers and 9 system descriptions presented together with 3 invited talks were carefully reviewed and selected from 116 submissions. The papers address all aspects of automated reasoning, including foundations, implementations, and applications.
