

1. Record Nr.	UNISA996465538203316
Titolo	Grid and Cooperative Computing [[electronic resource] ] : Second International Workshop, GCC 2003, Shanghai, China, December 7-10, 2003, Revised Papers, Part II // edited by Minglu Li, Xian-He Sun, Qianni Deng, Jun Ni
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	1-280-30752-8 9786610307524 3-540-24680-0
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (LXXVI, 1078 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 3033
Disciplina	004.36
Soggetti	Computers Computer communication systems Operating systems (Computers) Information storage and retrieval Application software User interfaces (Computer systems) Theory of Computation Computer Communication Networks Operating Systems Information Storage and Retrieval Information Systems Applications (incl. Internet) User Interfaces and Human Computer Interaction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Session 6: Advanced Resource Management, Scheduling, and Monitoring -- Session 7: Network Communication and Information Retrieval -- Session 8: Grid QoS -- Session 9: Algorithm, Economic Model, Theoretical Model of the Grid -- Session 10: Semantic Grid and Knowledge Grid -- Session 11: Data Remote Access, Storage, and Sharing -- Session 12: Computer-Supported Cooperative Work and

Grid and cooperative computing has emerged as a new frontier of information technology. It aims to share and coordinate distributed and heterogeneous network resources for better performance and functionality that can otherwise not be achieved. This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing, GCC 2003, which was held in Shanghai, P.R. China, during December 7–10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and users in Grid computing, Web services and cooperative computing, including theory and applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, significance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The organizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers). The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Australia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.
