Sommario/riassunto	Theseproceedingscontaintherefereedfulltechnicalpaperspresentedatthe 26th Annual European Conference on Information Retrieval (ECIR 2004). ECIR is theannualconferenceoftheBritishComputerSociety'sspecialistgroupinInf- mation Retrieval. This year the conference was held at the School of Computing and Technology at the University of Sunderland. ECIR began life as the - nual Colloquium on Information Retrieval Research. The colloquium was held in the UK each year until 1998 when the event was held in Grenoble, France. Since then the

conference venue has alternated between the United Kingdom and Continental Europe, and the event was renamed the European Conference on Information Retrieval. In recent years, ECIR has continued to grow and has become the major European forum for the discussion of research in the ?eld of Information Retrieval. To mark this metamorphosis from a small informal c- loquium to a major event in the IR research calendar, the BCS-IRSG decided to rename the event to the European Conference on Information Retrieval. ECIR2004received88fullpapersubmissions,fromacrossEuropeandfurther a?eldincludingNorthAmerica,ChinaandAustralia, atestamenttothegrowing popularity and reputation of the conference. Out of the 88 submitted papers, 28 were accepted for presentation. All papers were reviewed by at least three reviewers. Among the accepted papers 11 have a student as the primary author, illustrating that the traditional student focus of the original colloquium is alive today.

	Sommario/riassunto	Repository. 49 Methods and Assignments for Writing Urban Places' offers a set of methods and assignments intended to stimulate new approaches in architecture, urban studies, and other fields of spatial development and to invite creative, often embodied, and sometimes playful engagements with the material and immaterial dimensions of

urban places. This 'Repository' collects 49 methods, defined here as systematic procedures, techniques and ways of acting, to explore, examine and discover urban places. Each method is described in a brief text and followed by a direct short assignment. Presented as a clear set of instructions, the assignment encourages and guides the reader to fully or partially explore and employ the method. As such, this Repository is intended to stay off the shelves and be a useful tool to inspire, accompany, and assist spatial professionals, researchers, students and communities alike to engage with urban places and to discover and develop responsible approaches to current urban challenges.00The Repository is a follow-up of the 'Vademecum: 77 Minor Terms for Writing Urban Places' and was compiled by an interdisciplinary group of international scholars connected through the EU COST Action network Writing Urban Places: New Narratives of the European City.
