

1. Record Nr.	UNISA996465593003316
Titolo	Transactions on Computational Science V [[electronic resource]] : Special Issue on Cognitive Knowledge Representation / / edited by Yingxu Wang, Keith Chan
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2009
ISBN	3-642-02097-6
Edizione	[1st ed. 2009.]
Descrizione fisica	1 online resource (XV, 237 p.)
Collana	Transactions on Computational Science, , 1866-4733 ; ; 5540
Disciplina	005.74
Soggetti	Database management Programming languages (Electronic computers) Data mining Information storage and retrieval Artificial intelligence Mathematical logic Database Management Programming Languages, Compilers, Interpreters Data Mining and Knowledge Discovery Information Storage and Retrieval Artificial Intelligence Mathematical Logic and Formal Languages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Toward a Formal Knowledge System Theory and Its Cognitive Informatics Foundations -- On Temporal Properties of Knowledge Base Inconsistency -- Images as Symbols: An Associative Neurotransmitter-Field Model of the Brodmann Areas -- Knowledge Reduction of Covering Approximation Space -- Formal Description of the Cognitive Process of Memorization -- Intelligent Processing of an Unrestricted Text in First Order String Calculus -- Knowledge Reduction in Concept Lattices Based on Irreducible Elements -- A Knowledge Representation Tool for Autonomous Machine Learning Based on Concept Algebra --

Dyna: A Tool for Dynamic Knowledge Modeling -- Rough Sets and Functional Dependencies in Data: Foundations of Association Reducts -- Hybrid Evolutionary Algorithm for the Graph Coloring Register Allocation Problem for Embedded Systems -- Extended Pawlak's Flow Graphs and Information Theory.

Sommario/riassunto

The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science, conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines. The journal focuses on original high-quality research in the realm of computational science in parallel and distributed environments, encompassing the facilitating theoretical foundations and the applications of large-scale computations and massive data processing. It addresses researchers and practitioners in areas ranging from aerospace to biochemistry, from electronics to geosciences, from mathematics to software architecture, presenting verifiable computational methods, findings and solutions and enabling industrial users to apply techniques of leading-edge, large-scale, high performance computational methods. The fifth volume of the Transactions on Computational Science journal, edited by Yingxu Wang and Keith C.C. Chan, is devoted to the subject of cognitive knowledge representation. This field of study focuses on the internal knowledge representation mechanisms of the brain and how these can be applied to computer science and engineering. The issue includes the latest research results in internal knowledge representation at the logical, functional, physiological, and biological levels and describes their impacts on computing, artificial intelligence, and computational intelligence.
