

1. Record Nr.	UNISA996465634603316
Titolo	On the Move to Meaningful Internet Systems. OTM 2017 Conferences [[electronic resource] ] : Confederated International Conferences: CoopIS, C&TC, and ODBASE 2017, Rhodes, Greece, October 23-27, 2017, Proceedings, Part I // edited by Hervé Panetto, Christophe Debruyne, Walid Gaaloul, Mike Papazoglou, Adrian Paschke, Claudio Agostino Ardagna, Robert Meersman
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-69462-6
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XXVII, 767 p. 280 illus.)
Collana	Programming and Software Engineering ; ; 10573
Disciplina	004.678
Soggetti	Artificial intelligence Application software Software engineering Computer security Data mining Computer communication systems Artificial Intelligence Information Systems Applications (incl. Internet) Software Engineering Systems and Data Security Data Mining and Knowledge Discovery Computer Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- General Co-chairs and Editors' Message for OnTheMove 2017 -- Organization -- OnTheMove 2017 Keynotes -- Pragmatic Semantics at Web Scale -- Evolution of the Industrial Internet of Things: Preparing for Change -- Contents - Part I -- Contents - Part II -- International Conference on Cooperative Information Systems (CoopIS) 2017 -- En -- Characterizing Regulatory Documents and Guidelines Based on Text

Mining -- 1 Introduction -- 2 Methodology -- 3 Description of Documents -- 3.1 Description of ISO/IEC Documents -- 3.2 Description of Medical Document -- 4 Evaluation -- 4.1 Case Study 1: ISO Documents -- 4.2 Case Study 2: Medical Document -- 5 Limitations and Application Scenarios -- 6 Related Work -- 7 Conclusion and Future Work -- References -- A Scalable Smart Meter Data Generator Using Spark -- 1 Introduction -- 2 Methodology -- 2.1 Overview -- 2.2 Algorithm Description -- 2.3 Optimization -- 3 Implementation on Spark -- 4 Evaluation -- 4.1 Effectiveness -- 4.2 Scalability -- 5 Related Work -- 6 Conclusions and Future Work -- References -- Network-Aware Stochastic Virtual Machine Placement in Geo-Distributed Data Centers -- 1 Introduction -- 2 Problem Formulation -- 2.1 Stochastic Optimization Model -- 2.2 Equivalent Optimization Formulation -- 2.3 Network-Aware Stochastic VM Placement Algorithm -- 3 Performance Evaluation -- 4 Conclusion -- References -- Finding Process Variants in Event Logs -- 1 Introduction -- 2 Preliminaries -- 3 Finding Process Variants in Event Logs -- 4 Implementation and Case Study -- 5 Related Work -- 6 Conclusions -- References -- Interactive and Incremental Business Process Model Repair -- 1 Introduction -- 2 Related Work -- 3 Behavioral Alignment -- 4 Extending Conformance Checking to Process Model Repair -- 4.1 Extension, Order and Impact of Differences -- 4.2 Visualization of Differences -- 5 Evaluation.

5.1 Experiment with Synthetic Datasets -- 5.2 Experiment with Real-Life Dataset -- 6 Conclusion -- References -- Control Flow Structure Preservation During Process Fragment Anonymization -- 1 Introduction -- 2 Control Flow Anonymization -- 3 Evaluation -- 4 Related Work -- 5 Conclusion and Discussion -- References -- Diversity-Aware Continuous Top-k Queries in Social Networks -- 1 Introduction and Related Work -- 2 Data and Processing Models -- 3 The DA-SANTA Algorithm -- 4 Experimental Evaluation -- References -- Modeling and Discovering Cancellation Behavior -- 1 Introduction -- 2 Related Work -- 2.1 Criteria for Comparison -- 2.2 Discussion of the Related Work -- 3 Event Logs and Process Trees -- 3.1 Preliminaries -- 3.2 Event Logs -- 3.3 Process Trees -- 3.4 Cancellation Process Trees -- 4 Heuristics for Error Oracle -- 5 Model Discovery -- 5.1 Directly Follows Graph and Cuts -- 5.2 Discovery Framework -- 5.3 Cancellation Discovery -- 6 Evaluation -- 6.1 Input and Methodology for Comparative Evaluation -- 6.2 Comparative Evaluation Results and Discussion -- 7 Conclusion -- References -- Introducing Collaboration for Locating Features in Models: Approach and Industrial Evaluation -- 1 Introduction -- 2 Background -- 3 Our Approach for Introducing Collaboration in FL -- 3.1 Automatic Query Reformulation -- 3.2 IR FL CORE -- 3.3 Linguistic Rules FL CORE -- 4 Evaluation -- 4.1 Definition -- 4.2 Data Set -- 4.3 Implementation Details -- 4.4 Planning and Execution -- 4.5 Results -- 4.6 Statistical Analysis -- 5 Threats to Validity -- 6 Related Work -- 7 Concluding Remarks -- References -- Context-Aware Access Control with Imprecise Context Characterization Through a Combined Fuzzy Logic and Ontology-Based Approach -- 1 Introduction -- 2 Significance of Our Research and General Requirements -- 2.1 Application Scenario -- 2.2 General Requirements. 3 Our Formal FCAAC Approach -- 3.1 Context Model -- 3.2 Policy Model -- 4 Ontology-Based FCAAC Approach -- 4.1 Modelling Contextual Conditions -- 4.2 Reasoning About Contextual Conditions -- 4.3 FCAAC Policy -- 5 Prototype and Evaluation -- 5.1 Practicality -- 5.2 Performance -- 6 Related Work and Discussion -- 7 Conclusion and Future Research -- References -- Semi-supervised Log Pattern Detection and Exploration Using Event Concurrence and Contextual

Information -- 1 Introduction -- 2 Related Work -- 3 Preliminaries -- 4  
Patterns and Pattern Instances -- 4.1 Core-Activity, Pattern and Pattern  
Instance -- 4.2 Pattern Support, Confidence and Coverage -- 5 Pattern  
Detection and Pattern Instance Matching -- 5.1 Pattern Detection  
Approaches - Partially Ordered Traces to Patterns -- 5.2 Computing a  
Maximal Set of Pattern Instances -- 6 Evaluation and Discussion -- 7  
Conclusion and Future Work -- References -- Cloud of Things  
Modeling for Efficient and Coordinated Resources Provisioning -- 1  
Introduction -- 2 Existing Models and Standards -- 2.1 Internet of  
Things Environment -- 2.2 Cloud Infrastructure Management Initiatives  
-- 2.3 Synthesis of Existing Works on Cloud and IoT Models and  
Standards -- 3 Related Works -- 4 Cloud of Things Infrastructure  
Model -- 4.1 Network Graph Model -- 4.2 Sensor and Actuator  
Resources -- 4.3 Things Virtualization -- 4.4 Things Integration  
Patterns -- 5 Cloud of Things Platform Model -- 5.1 Cloud of Things  
Deployment Options -- 5.2 Data Components Sharing -- 6 Example  
Scenarios -- 6.1 Resources Description -- 6.2 Mapping Process -- 7  
Cloud of Things Placement Problem Formulation -- 8 Simulation and  
Results -- 9 Conclusion and Perspectives -- References -- A  
Framework for Integrating Real-World Events and Business Processes in  
an IoT Environment -- 1 Introduction -- 2 Foundations -- 2.1 Business  
Process Management.  
2.2 Complex Event Processing -- 3 Requirements Analysis -- 4 Related  
Work -- 5 Conceptual Framework -- 5.1 Event Generation and  
Aggregation -- 5.2 Event Binding Points -- 5.3 Event Subscription and  
Correlation -- 5.4 Reaction on Events -- 6 Implementation -- 6.1  
Unicorn Event Processing Platform -- 6.2 Gryphon Case Modeler -- 6.3  
Chimera Case Engine -- 7 Conclusion and Future Work -- References  
-- Methodological Support for Coordinating Tasks in Global Product  
Software Engineering -- 1 Introduction -- 2 Research Method: The  
Design Cycle -- 2.1 The Method Association Approach -- 2.2 Method  
Evaluation Approach -- 3 Problem Investigation -- 3.1 Literature Study  
-- 3.2 The Global Task Coordination Framework -- 3.3 Identifying  
Activity Groups -- 3.4 Identifying Method Fragments -- 4 Solution  
Design: Construction of a Global Task Coordination Method -- 4.1  
Method Association -- 4.2 Method Assembly -- 4.3 Method Validation  
-- 5 Discussion -- 6 Conclusions and Future Research -- Appendix A  
The Global Task Coordination Method -- References -- Enhancing  
Process Models to Improve Business Performance: A Methodology and  
Case Studies -- 1 Introduction -- 2 Preliminaries -- 2.1 Petri Nets and  
Event Logs -- 2.2 Aligning Petri Nets and Event Logs and Repairing  
Event Logs -- 3 The Methodology -- 3.1 Deviation Analysis -- 3.2  
Repair and Merge Log Clusters -- 3.3 Repair Model -- 4  
Implementation and Evaluation -- 4.1 UWV Case Study -- 4.2 SAP  
Procurement Case Study -- 5 Related Work -- 6 Conclusion --  
References -- TraDE - A Transparent Data Exchange Middleware for  
Service Choreographies -- 1 Introduction -- 2 Transparent Data  
Exchange Approach -- 2.1 Cross-Partner Data Objects and Cross-  
Partner Data Flows -- 2.2 Towards a TraDE Middleware -- 3 The TraDE  
Middleware -- 3.1 Metamodel -- 3.2 Architecture -- 3.3 Integration  
with Process Engines -- 4 Validation.  
5 Evaluation -- 5.1 Evaluation Methodology and Experimental Setup --  
5.2 Experimental Results -- 6 Related Work -- 7 Conclusions and  
Outlook -- References -- Building the Most Creative and Innovative  
Collaborative Groups Using Bayes Classifiers -- Abstract -- 1  
Introduction -- 2 Related Work on Collaborative Creativity -- 3 A Bayes  
Classifier-Based Model and Method for Building Optimally Creative and  
Innovative Groups -- 3.1 Bayesian Network Classifiers -- 3.2 General

Model for Building "the Best" Collaborative Groups -- 3.3 Model Instantiation for Building the Most Creative Learning Groups -- 4 Case Study - A Real-World Scenario -- 5 Discussion -- 6 Conclusions and Future Work -- References -- A New Collaborative Paradigm of Computer Science Student Contests: An Experience -- Abstract -- 1 Introduction -- 2 Computer Science Contests -- 2.1 Computer Programming Contests -- 2.2 New Paradigms -- 3 Our Experience with Computer Science Contests -- 3.1 Evolution of Our Contest -- 3.2 A New Paradigm: Three-Words-from-a-Hat -- 3.3 Experiencing the New Paradigm -- 4 Is the New Paradigm Beneficial for Computer Science Education? -- 4.1 Is Competition Beneficial to Education? -- 4.2 Reflecting on the New Paradigm -- 5 Conclusions -- References -- Ranking-Based Evaluation of Process Model Matching -- 1 Introduction -- 2 Problem Statement -- 3 Probabilistic Evaluation of Process Model Matching -- 4 Evaluation Experiments -- 4.1 Setup -- 4.2 Results -- 5 Related Work -- 6 Conclusion -- References -- Analysis and Re-configuration of Decision Logic in Adaptive and Data-Intensive Processes (Short Paper) -- 1 Introduction -- 2 Challenges for Decision Logic Re-configuration: A Loan Approval Motivation Scenario -- 3 Supporting Decision Propagation in Business Processes -- 3.1 Feature-Oriented Representation of Decision Logic.  
3.2 Constraint-Based Analysis of Decision Logic.

---

Sommario/riassunto

This double volumes LNCS 10573-10574 constitutes the refereed proceedings of the Confederated International Conferences: Cooperative Information Systems, CoopIS 2017, Ontologies, Databases, and Applications of Semantics, ODBASE 2017, and Cloud and Trusted Computing, C&TC, held as part of OTM 2017 in October 2017 in Rhodes, Greece. The 61 full papers presented together with 19 short papers were carefully reviewed and selected from 180 submissions. The OTM program every year covers data and Web semantics, distributed objects, Web services, databases, information systems, enterprise workow and collaboration, ubiquity, interoperability, mobility, grid and high-performance computing.
