   Sommario/riassunto This book constitutes the thoroughly reviewed joint postprocessings of
                       two international workshops on Coordination, Organization,
                       Institutions and Norms in Agent Systems, COIN@AAMAS 2010, held in
                       Toronto, Canada in May 2010 and COIN@MALLOW 2010, held in Lyon,
                       France in August 2010. The 20 revised full papers presented went
                       through several rounds of reviewing and revision and were carefully

selected for presentations. The papers are organized in topical sections on normative systems design and modeling; social aspects; and norms at runtime: learning and enforcing.
