| Sommario/riassunto | This book constitutes the thoroughly refereed proceedings of the 11th International Conference on Design Science Research in Information |

Systems and Technology, DESRIST 2016, held in St. John, Newfoundland, Canada, in May 2016. The 11 full papers, 2 short papers and 9 short papers describing prototypes and products were carefully reviewed and selected from 54 submissions. The papers are organized around the following topics: methodological aspects of design science; applications of design science research to real world design problems, for example in social media, health care systems, embedded technologies, climate, security.
