

1. Record Nr.	UNISA996465688403316
Titolo	Advances in Databases and Information Systems [[electronic resource]] : 14th East European Conference, ADBIS 2010, Novi Sad, Serbia, September 20-24, 2010, Proceedings // edited by Barbara Catania, Mirjana Ivanovic, Bernhard Thalheim
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2010
ISBN	3-642-15576-6
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (XV, 600 p. 230 illus.)
Collana	Information Systems and Applications, incl. Internet/Web, and HCI ; ; 6295
Disciplina	004
Soggetti	Database management Application software Information storage and retrieval Computer communication systems Data mining Management information systems Computer science Database Management Information Systems Applications (incl. Internet) Information Storage and Retrieval Computer Communication Networks Data Mining and Knowledge Discovery Management of Computing and Information Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This volume contains the best papers presented at the 14th East-European Conference on Advances in Databases and Information Systems (ADBIS 2010), held during September 20-24, 2010, in Novi Sad, Serbia. ADBIS 2010 continued the ADBIS series held in St. Petersburg (1997), Poznan (1998), Maribor (1999), Prague (2000),

Vilnius (2001), Bratislava (2002), Dresden (2003), Budapest (2004), Tallinn (2005), Thessaloniki (2006), Varna (2007), Pori (2008), and Riga (2009). The main objective of the ADBIS series of conferences is to provide a forum for the dissemination of research accomplishments and to promote interaction and collaboration between the database and information systems research communities from Central and East European countries and the rest of the world. The ADBIS conferences provide an international platform for the presentation of research on database theory, development of advanced DBMS technologies, and their advanced applications. ADBIS 2010 spans a wide area of interests, covering all major aspects related to theory and applications of database technology and information systems. Two different submission lines were considered for ADBIS 2010, one within the classic track and another one within a special track organisation. ADBIS comprised five tracks: 1. Conceptual Modeling in Systems Engineering (CMSE) 2. Data Mining and Information Extraction (DMIE) 3. Business Processes in E-Commerce Systems (e-commerce) 4. Personal Identifiable Information: Privacy, Ethics, and Security (PIIPES) 5.
