Includes bibliographical references and index. Nota di bibliografia This book constitutes the refereed proceedings of the 10th Sommario/riassunto International Symposium, PETS 2011, held in Waterloo, Canada, in July 2011. The 15 revised full papers were carefully reviewed and selected

from 61 submissions. The papers address design and realization of

communication networks. Presenting novel research on all theoretical

privacy services for the Internet, other data systems and

and practical aspects of privacy technologies, as well as experimental studies of fielded systems the volume also features novel technical contributions from other communities such as law, business, and data protection authorities, that present their perspectives on technological issues.
