	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Information retrieval and data mining on the Web -- Web as a text repository and as a graph, induced in various ways by link among pages, hosts and users -- The understanding of graphs that arise from the Web and various user activities on the Web -- Stimulation of the development of high-performance algorithms and applications that exploit these graphs.
	Sommario/riassunto	This book constitutes the proceedings of the 15th International Workshop on Algorithms and Models for the Web Graph, WAW 2018, held in Moscow, Russia in May 2018. The 11 full papers presented in

this volume were carefully reviewed and selected from various submissions. The papers focus on topics like the information retrieval and data mining on the Web; Web as a text repository and as a graph, induced in various ways by link among pages, hosts and users; the understanding of graphs that arise from the Web and various user activities on the Web; stimulation of the development of high-performance algorithms and applications that exploit these graphs.
