1.	Record Nr.	UNISA996465793603316
	Titolo	Medical Image Computing and Computer-Assisted Intervention - MICCAI 2003 [[electronic resource]] : 6th International Conference, Montréal, Canada, November 15-18, 2003, Proceedings, Part II / / edited by Randy E. Ellis, Terry M. Peters
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2003
	ISBN	3-540-39903-8
	Edizione	[1st ed. 2003.]
	Descrizione fisica	1 online resource (LXVIII, 1006 p.)
	Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 2879
	Disciplina	616.07/54/0285
	Soggetti	Radiology Computers Optical data processing Health informatics Artificial intelligence Computer graphics Imaging / Radiology Theory of Computation Image Processing and Computer Vision Health Informatics Artificial Intelligence Computer Graphics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
	Nota di contenuto	Medical Image Processing -- Visualization and Navigation -- Interventional Imaging -- Image Morphometry -- Segmentation II -- Registrations and Atlases -- Short Communications.
	Sommario/riassunto	The 6th International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI2003, was held in Montreal, Qu´ebec, Canada at the Fairmont Queen Elizabeth Hotel during November 15–18, 2003. This was the first time the conference had been held in Canada.

The proposal to host MICCAI 2003 originated from discussions within the Ontario Consortium for Ima- guided Therapy and Surgery, a multi-institutional research consortium that was supported by the Government of Ontario through the Ontario Ministry of Enterprise, Opportunity and Innovation. The objective of the conference was to offer clinicians and scientists a - rum within which to exchange ideas in this exciting and rapidly growing field. MICCAI 2003 encompassed the state of the art in computer-assisted interventions, medical robotics, and medical-image processing, attracting experts from numerous multidisciplinary professions that included clinicians and surgeons, computer scientists, medical physicists, and mechanical, electrical and biomedical engineers. The quality and quantity of submitted papers were most impressive. For MICCAI 2003 we received a record 499 full submissions and 100 short communications. All full submissions, of 8 pages each, were reviewed by up to 5 reviewers, and the 2-page contributions were assessed by a small subcommittee of the Scientific Review Committee. All reviews were then considered by the MICCAI 2003 Program Committee, resulting in the acceptance of 206 full papers and 25 short communications. The normal mode of presentation at MICCAI 2003 was as a poster; in addition, 49 papers were chosen for oral presentation.
