

1. Record Nr.	UNISA996465840203316
Titolo	Knowledge Representation for Agents and Multi-Agent Systems [[electronic resource]] : First International Workshop, KRAMAS 2008, Sydney, Australia, September 17, 2008, Revised Selected Papers // edited by John-Jules Meyer, Jan M. Broersen
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2009
ISBN	3-642-05301-7
Edizione	[1st ed. 2009.]
Descrizione fisica	1 online resource (VII, 162 p.)
Collana	Lecture Notes in Artificial Intelligence ; ; 5605
Classificazione	DAT 709f SS 4800
Disciplina	004n/a
Soggetti	Artificial intelligence User interfaces (Computer systems) Computers Mathematical logic Data mining Application software Artificial Intelligence User Interfaces and Human Computer Interaction Theory of Computation Mathematical Logic and Formal Languages Data Mining and Knowledge Discovery Information Systems Applications (incl. Internet) Kongress. Sydney (2008)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	International conference proceedings.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Reasoning about Other Agents' Beliefs under Bounded Resources -- Normative Multi-agent Programs and Their Logics -- Modal Logics for Preferences and Cooperation: Expressivity and Complexity -- Simulation and Information: Quantifying over Epistemic Events -- On the Dynamics of Institutional Agreements -- From Trust in Information

Sources to Trust in Communication Systems: An Analysis in Modal Logic
-- Pre-processing Techniques for Anytime Coalition Structure
Generation Algorithms -- Cognitive Use of Artifacts: Exploiting
Relevant Information Residing in MAS Environments -- Information-
Based Argumentation -- Mediation = Information Revelation +
Analogical Reasoning.

Sommario/riassunto

This book constitutes the thoroughly refereed post-workshop proceedings of the First International Workshop on Knowledge Representation for Agents and Multi-Agent Systems, KRAMAS 2008, held in Sydney, Australia, in September 2008 as a satellite event of KR 2008, the 11th International Conference on Principles of Knowledge Representation and Reasoning. The 10 revised full papers presented were carefully reviewed and selected from 14 submissions. The papers foster the cross-fertilization between the KR (knowledge representation and reasoning) and agent communities, by discussing knowledge representation theories and techniques for agent-based systems.
