1.
Record Nr.	UNISA996465851903316
Titolo	Hardware and software, verification and testing : second International Haifa Verification Conference, HVC 2006, Haifa, Israel, October 23-26, 2006, revised selected papers / / Eyal Bin, Avi Ziv, Shmuel Ur (editors)
Pubbl/distr/stampa	Berlin ; ; Heidelberg : , : Springer, , [2007] ©2007
ISBN	1-280-86571-7 9786610865710 3-540-70889-8
Edizione	[1st ed. 2007.]
Descrizione fisica	1 online resource (XII, 235 p.)
Collana	Lecture notes in computer science ; ; 4383
Disciplina	004
Soggetti	Computer systems - Verification Computer software - Verification Computer programs - Verification Integrated circuits - Verification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Hardware Verification Track -- Model Checking PSL Using HOL and SMV -- Using Linear Programming Techniques for Scheduling-Based Random Test-Case Generation -- Extracting a Simplified View of Design Functionality Based on Vector Simulation -- Automatic Fault Localization for Property Checking -- Verification of Data Paths Using Unbounded Integers: Automata Strike Back -- Tools Track -- Smart-Lint: Improving the Verification Flow -- Model-Driven Development with the jABC -- Detecting Design Flaws in UML State Charts for Embedded Software -- A Panel: Unpaved Road Between Hardware Verification and Software Testing Techniques -- An Open Source Simulation Model of Software Development and Testing -- Software Testing Track -- ExpliSAT: Guiding SAT-Based Software Verification with Explicit States -- Evolutionary Testing: A Case Study -- A Race-Detection and Flipping Algorithm for Automated Testing of Multi-threaded Programs -- Explaining Intermittent Concurrent Bugs by Minimizing Scheduling Noise -- Testing the Machine in the World --

Choosing a Test Modeling Language: A Survey -- Making Model-Based Testing More Agile: A Use Case Driven Approach.

Sommario/riassunto	The Haifa Verification Conference 2006 took place for the second year in a row at the IBM Haifa Research Lab and at the Haifa University in Israel during October 23–26, 2006. The verification conference was a three-day, single-track conference followed by a one-day tutorial on PSL. This Haifa Verification Conference was established to bring together researchers from two different disciplines, hardware verification and software testing. The use of similar techniques among the two communities enabled the conference to help generate a unique synergy that fortifies both groups. This year, we had two traditional tracks, hardware verification and software testing, in addition to a new track dedicated to tools in these areas. The conference emphasized applicability to real-world challenges, which was vital to the many attendees coming from industry. The conference hosted two internationally recognized individuals as keynote speakers. Randal E. Bryant, Dean and University Professor from the School of Computer Science at Carnegie Mellon University gave a talk on "System Modeling and Formal Verification with UCLID" and Michael Jackson from the University of Newcastle gave a talk on "Testing the Machine in the World. " The numerous invited speakers presented topics of great interest to the audience. Just some of these outstanding speakers included Cindy Eisner in the hardware verification track, Alon Gluska and Andrew Piziali in the tools track, and Mauro Pezze and Nir Shavit in the software testing track.
