

1. Record Nr.	UNISA996465887103316
Titolo	Transactions on Computational Science III [[electronic resource] /] / edited by C. J. Kenneth Tan
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2009
ISBN	3-642-00212-9
Edizione	[1st ed. 2009.]
Descrizione fisica	1 online resource (XI, 185 p.)
Collana	Transactions on Computational Science, , 1866-4733 ; ; 5300
Disciplina	004.6
Soggetti	Computer organization User interfaces (Computer systems) Computers Data mining Multimedia systems Aerospace engineering Astronautics Computer Systems Organization and Communication Networks User Interfaces and Human Computer Interaction Information Systems and Communication Service Data Mining and Knowledge Discovery Media Design Aerospace Technology and Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1: Computational Visualization and Optimization -- Visual Immersive Haptic Mathematics in Shared Virtual Spaces -- The Voronoi Diagram of Circles and Its Application to the Visualization of the Growth of Particles -- Designing Aircraft Cockpit Displays: Borrowing from Multimodal User Interfaces -- Parallel Optimal Weighted Links -- Parallel Simulation of Oil Reservoirs on a Multi-core Stream Computer -- 2: Computational Methods for Model Design and Analysis -- Efficient Reversible Logic Design of BCD Subtractors -- Missing Data Analysis: A Kernel-Based Multi-Imputation Approach -- The Average

Solution of a Stochastic Nonlinear Schrodinger Equation under Stochastic Complex Non-homogeneity and Complex Initial Conditions  
-- Neural Network Representation for the Forces and Torque of the Eccentric Sphere Model.

---

## Sommario/riassunto

The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science, conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines. The journal focuses on original high-quality research in the realm of computational science in parallel and distributed environments, encompassing the facilitating theoretical foundations and the applications of large-scale computations and massive data processing. It addresses researches and practitioners in areas ranging from aerospace to biochemistry, from electronics to geosciences, from mathematics to software architecture, presenting verifiable computational methods, findings and solutions and enabling industrial users to apply techniques of leading-edge, large-scale, high performance computational methods. Transactions on Computational Science III is devoted to the topic of computer systems research and its application, and is divided in two parts. The five papers in Part 1 focus on computational visualization and optimization, and the four papers in Part 2 are concerned with computational methods for model design and analysis.
