1. **Record Nr.**   UNISA996465889603316

   Titolo   Numerical Analysis and Its Applications [[electronic resource]] : 4th International Conference, NAA 2008 Lozenetz, Bulgaria, June 16-20, 2008, Revised Selected Papers / / edited by Svetozar D. Margenov, Lubin Georgiev Vulkov, Jerzy Wasniewski

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2009

   ISBN   3-642-00464-4

   Edizione   [1st ed. 2009.]

   Descrizione fisica   1 online resource (XII, 636 p.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ; 5434

   Classificazione   MAT 650f
                             SS 4800

   Disciplina   005.11

   Soggetti   Computer programming
                             Computer simulation
                             Numerical analysis
                             Algorithms
                             Computer science—Mathematics
                             Discrete mathematics
                             Programming Techniques
                             Computer Modelling
                             Numerical Analysis
                             Discrete Mathematics in Computer Science

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references and index.

   Sommario/riassunto   This book constitutes the thoroughly refereed post-conference proceedings of the 4th International Conference on Numerical Analysis and Its Applications, NAA 2008, held in Lozenetz, Bulgaria in June 2008. The 61 revised full papers presented together with 13 invited papers were carefully selected during two rounds of reviewing and improvement. The papers address all current aspects of numerical analysis and discuss a wide range of problems concerning recent achievements in physics, chemistry, engineering, and economics. A

special focus is given to numerical approximation and computational geometry, numerical linear algebra and numerical solution of transcendental equations, numerical methods for differential equations, numerical modeling, and high performance scientific computing.
