

1. Record Nr.	UNISA996465894503316
Titolo	Web Engineering [[electronic resource]] : International Conference, ICWE 2003, Oviedo, Spain, July 14-18, 2003. Proceedings // edited by Juan Manuel Cueva Lovelle, Bernardo Martín González Rodríguez, Luis Joyanes Aguilar, Jose Emilio Labra Gayo, María del Puerto Paule de Ruiz
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2003
ISBN	3-540-45068-8
Edizione	[1st ed. 2003.]
Descrizione fisica	1 online resource (XIX, 554 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 2722
Disciplina	004.678
Soggetti	Computer communication systems Software engineering Computers Artificial intelligence Computers and civilization Management information systems Computer science Computer Communication Networks Software Engineering Information Systems and Communication Service Artificial Intelligence Computers and Society Management of Computing and Information Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Invited Papers -- Agents on the Web -- E-commerce -- E-learning -- Human-Computer Interaction -- Languages and Tools -- Mobility and the Web -- Multimedia Techniques and Telecommunications -- Security -- Web Quality and Testing -- Semantic Web -- Web Applications Development.
Sommario/riassunto	In the last decade, we have seen tremendous successes in World Wide

Web and Internet technologies. Traditional development techniques had to be adapted to this new situation, and at the same time new techniques emerged. Many research teams began to investigate different ways to adapt classic – but still effective – software engineering design and development techniques to the Web and Web engineering emerged as a new research field that relates several subject areas, including agents, e-commerce, e-learning, human-computer interaction, mobile technologies, security, quality and testing, the Semantic Web, etc. The International Conference on Web Engineering (ICWE) continued the tradition of earlier conferences with the aim of bringing together researchers and practitioners in these areas, trying to offer a good environment where people with different backgrounds could exchange their insights in this area.

The success of this conference generated an incredible amount of work for the Program Committee members and the External Reviewers, led by the Program Committee chairs Oscar Pastor López, Luis Olsina Santos and Martín González Rodríguez. We are immensely grateful for the effort they put into the process of selecting the very best papers. There were 190 papers submitted, with 25 papers accepted (13%) as long papers. A large number of papers describing ongoing research were included as short papers or posters. Unfortunately, we were forced to reject many good papers. Paper selection is always a difficult task.
