   Sommario/riassunto   This book constitutes the refereed proceedings of the Second
                        International Conference on Computational Logistics, ICCL 2011, held
                        in Hamburg, Germany, in September 2011. The 26 revised full papers
                        presented were carefully reviewed and selected from numerous
                        submissions. The papers are organized in topical sections on transport
                        services, logistics systems and production, and maritime shipping and
                        container terminals.
