

1. Record Nr.	UNISA996465906203316
Titolo	Machine Learning and Knowledge Discovery in Databases, Part II [[electronic resource]] : European Conference, ECML PKDD 2010, Athens, Greece, September 5-9, 2011, Proceedings, Part II / / edited by Dimitrios Gunopulos, Thomas Hofmann, Donato Malerba, Michalis Vazirgiannis
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2011
ISBN	3-642-23783-5
Edizione	[1st ed. 2011.]
Descrizione fisica	1 online resource (XXII, 681 p. 163 illus., 113 illus. in color.)
Collana	Lecture Notes in Artificial Intelligence ; ; 6912
Disciplina	006.3
Soggetti	Artificial intelligence Database management Information storage and retrieval Mathematical logic Algorithms Mathematical statistics Artificial Intelligence Database Management Information Storage and Retrieval Mathematical Logic and Formal Languages Algorithm Analysis and Problem Complexity Probability and Statistics in Computer Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This three-volume set LNAI 6911, LNAI 6912, and LNAI 6913 constitutes the refereed proceedings of the European conference on Machine Learning and Knowledge Discovery in Databases: ECML PKDD 2011, held in Athens, Greece, in September 2011. The 121 revised full papers presented together with 10 invited talks and 11 demos in the three volumes, were carefully reviewed and selected from about 600

paper submissions. The papers address all areas related to machine learning and knowledge discovery in databases as well as other innovative application domains such as supervised and unsupervised learning with some innovative contributions in fundamental issues; dimensionality reduction, distance and similarity learning, model learning and matrix/tensor analysis; graph mining, graphical models, hidden markov models, kernel methods, active and ensemble learning, semi-supervised and transductive learning, mining sparse representations, model learning, inductive logic programming, and statistical learning. a significant part of the papers covers novel and timely applications of data mining and machine learning in industrial domains.
