

1. Record Nr.	UNISA996465911003316
Titolo	Asian digital libraries : Looking back 10 years and forging new frontiers : 10th International Conference on Asian Digital Libraries, ICADL 2007, Hanoi, Vietnam, December 10-13, 2007 : proceedings // Dion Hoe Lian Goh [and four others], editors
Pubbl/distr/stampa	Berlin ; ; Heidelberg : , : Springer-Verlag, , [2007] ©2007
ISBN	3-540-77094-1
Edizione	[1st ed. 2007.]
Descrizione fisica	1 online resource (XVII, 522 p.)
Collana	Lecture Notes in Computer Science ; ; 4822
Disciplina	025.00285
Soggetti	Digital libraries Computer network resources
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Keynote Addresses -- Multicultural and Globalized Digital Libraries: Digitizing and Empowering the "Other" -- From Content Organization to User Empowerment -- Archival Tools to Match the Web: Open, International, Comprehensive -- Invited Talks -- Digital Archiving: Making it Happen -- Information Access Through Digital Library Systems -- How to Prepare a European Digital Library -- Usability and Evaluation -- Evaluation of Hospital Portals Using Knowledge Management Mechanisms -- Supporting Student Collaboration for Image Indexing -- Analysing HTTP Logs of a European DL Initiative to Maximize Usage and Usability -- Digital Library Evaluation Make Simple with Nielsen's Design Heuristics: Design Compliance and Importance -- Digital Archives -- On Building a Full-Text Digital Library of Historical Documents -- Towards a Digital Archive for Handwritten Paper Slips with Ethnological Contents -- Information Retrieval Techniques I -- Automatic Classification of Web Search Results: Product Review vs. Non-review Documents -- An Effective Algorithm for Dimensional Reduction in Collaborative Filtering -- Modeling and Learning User Profiles for Personalized Content Service -- Ontology-Based Fuzzy Retrieval for Digital Library -- Multilingual Techniques -- Feature Reinforcement Approach to Poly-lingual Text Categorization --

Development of Prototype Morphological Analyzer for the South Indian Language of Kannada -- Semantic Similarity Measures for Malay Sentences -- Enabling Resource Selection Based on Written English and Intellectual Competencies -- Information Seeking and Use -- QRselect: A User-Driven System for Collecting Translation Document Pairs from the Web -- Humanities Graduate Students' Use Behavior on Full-Text Databases for Ancient Chinese Books -- Annotations and Digital Libraries: Designing Adequate Test-Beds -- A Method of Fair Use in Digital Rights Management -- European DLs I -- Ontology-Based Metadata Integration in the Cultural Heritage Domain -- It Is the Time for the Digital Library to Meet the Enterprise Architecture -- Multimedia Digital Libraries -- Multimedia in Cultural Heritage Collections: A Model and Applications -- Graph-Based Indexing and Querying on Image Corpora with Unified Visual Semantic and Relational Descriptions -- Copyright, Patent and Trade Secret on Digital Libraries: Current Issues and Future Trends -- A Query-Free Retrieving Method Based on Content Elements' Order for Multimedia News Archives -- Information Retrieval Techniques II -- Adaptive Search Suggestions for Digital Libraries -- A Ranking Scheme for XML Information Retrieval Based on Benefit and Reading Effort -- Improving MEDLINE Document Retrieval Using Automatic Query Expansion -- Personal Name Disambiguation in Web Search Results Based on a Semi-supervised Clustering Approach -- European DLs II -- Preserving Interactive Multimedia Art: A Case Study in Preservation Planning -- Identification of FRBR Works Within Bibliographic Databases: An Experiment with UNIMARC and Duplicate Detection Techniques -- Digital Library 2.0 -- Predicting Social Annotation by Spreading Activation -- Mobile Tagging and Accessibility Information Sharing Using a Geospatial Digital Library -- Social Navigation in Digital Libraries by Bookmarking -- Blog Classification Using Tags: An Empirical Study -- Information Mining I -- Keyphrase Extraction in Scientific Publications -- Automated Template-Based Metadata Extraction Architecture -- Using Automatic Metadata Extraction to Build a Structured Syllabus Repository -- Automatic Text Summarization in Engineering Information Management -- User Interfaces -- The PENG System: Integrating Push and Pull for Information Access -- BrowsReader: A System for Realizing a New Children's Reading Environment in a Library -- Desktop Search Engine Visualisation and Evaluation -- Digital Libraries and Digitised Maps: An Early Overview of the DIGMAP Project -- SMS – Its Use in the Digital Library -- Information Mining II -- Understanding Topic Influence Based on Module Network -- Development of Indian Agricultural Research Ontology: Semantic Rich Relations Based Information Retrieval System for Vidyanidhi Digital Library -- Organizing News Archives by Near-Duplicate Copy Detection in Digital Libraries -- An Efficient Dictionary Mechanism Based on Double-Byte -- Digital Libraries and Education -- Content-Based Language Learning in a Digital Library -- Further Development of a Digital Library Curriculum: Evaluation Approaches and New Tools -- Managing Offline Educational Web Contents with Search Engine Tools -- Presentation Lag Reduction by Scheduling Media Objects for Auto-assembled Multimedia Presentations from Educational Digital Libraries -- Information Organization -- Metadata and Organizational Structures in Personal Photograph Digital Libraries -- Building a Directory for the Underdeveloped Web: An Experiment on the Arabic Medical Web Directory -- Recommending Scientific Literatures in a Collaborative Tagging Environment -- Bridging Community Resource Gateways by Linking Community Taxonomies -- Functional Requirements for Subject Authority Records (FRSAR): A Conceptual Model of Aboutness

-- Posters -- Mining Police Digital Archives to Link Criminal Styles with Offender Characteristics -- Merging Local and Global Gazetteers -- Towards a Hierarchical Framework for Predicting the Best Answer in a Question Answering System -- 2 Directional 2 Dimensional Pairwise FLD for Handwritten Kannada Numeral Recognition -- A Hybrid Approach of Noun Phrase Translation in Cross-Language Information Retrieval -- Deriving Tree-Structured Network Relations in Bibliographic Databases -- The Efficacy of Tags in Social Tagging Systems -- Synopsis Information Extraction in Documents Through Probabilistic Text Classifiers -- Small World Phenomenon and Author Collaboration: How Small and Connected Is the Digital Library World? -- Evaluating the Comprehensiveness of Wikipedia: The Case of Biochemistry -- ICADL: The Prolific Contributors.

Sommario/riassunto

The International Conference on Asian Digital Libraries (ICADL) is one of the leading international conferences in digital libraries research. The conference has come a long way since its inception in 1998 as the First Asia Digital Library Workshop held in Hong Kong. Since then, the conference has traveled across the Asian continent and has been hosted by Taiwan (ICADL 1999), Seoul, Korea (ICADL 2000), Bangalore, India (ICADL 2001), Singapore (ICADL 2002), Kuala Lumpur, Malaysia (ICADL 2003), Shanghai, China (ICADL 2004), Bangkok, Thailand (ICADL 2005), and Kyoto, Japan (ICADL 2006). The 2007 edition of the conference marks an important milestone in the ICADL series. Into its tenth year, the conference matured into a significant gathering of practitioners, researchers, educators and policy makers from diverse disciplines sharing a common interest in advancing digital libraries research in Asia. ICADL 2007 was held in Hanoi, Vietnam during December 10–13, 2007, with the theme, “Asian Digital Libraries: Looking Back 10 Years and Forging New Frontiers.” The theme reflects upon the growth of the digital libraries community and explores new areas that the community could delve into in the coming years.
