

1. Record Nr.	UNISA996465914903316
Titolo	Advances in Neural Networks -- ISSN 2010 [[electronic resource]] : 7th International Symposium on Neural Networks, ISSN 2010, Shanghai, China, June 6-9, 2010, Proceedings, Part II // edited by James Kwok, Liqing Zhang, Bao-Liang Lu
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2010
ISBN	1-280-38679-7 9786613564719 3-642-13318-5
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (XXX, 641 p. 247 illus.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 6064
Disciplina	004.0151
Soggetti	Computer science Computer programming Data structures (Computer science) Information theory Computer vision Pattern recognition systems Artificial intelligence Theory of Computation Programming Techniques Data Structures and Information Theory Computer Vision Automated Pattern Recognition Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	SVM and Kernel Methods -- Vision and Image -- Data Mining and Text Analysis -- BCI and Brain Imaging -- Applications.
Sommario/riassunto	This book and its sister volume collect refereed papers presented at the 7th International Symposium on Neural Networks (ISSN 2010), held in Shanghai, China, June 6-9, 2010. Building on the success of the

previous six successive ISNN symposiums, ISNN has become a well-established series of popular and high-quality conferences on neural computation and its applications. ISNN aims at providing a platform for scientists, researchers, engineers, as well as students to gather together to present and discuss the latest progresses in neural networks, and applications in diverse areas. Nowadays, the field of neural networks has been fostered far beyond the traditional artificial neural networks. This year, ISNN 2010 received 591 submissions from more than 40 countries and regions. Based on rigorous reviews, 170 papers were selected for publication in the proceedings. The papers collected in the proceedings cover a broad spectrum of fields, ranging from neurophysiological experiments, neural modeling to extensions and applications of neural networks. We have organized the papers into two volumes based on their topics. The first volume, entitled "Advances in Neural Networks- ISNN 2010, Part 1," covers the following topics: neurophysiological foundation, theory and models, learning and inference, neurodynamics. The second volume entitled "Advance in Neural Networks ISNN 2010, Part 2" covers the following five topics: SVM and kernel methods, vision and image, data mining and text analysis, BCI and brain imaging, and applications.
