1. Record Nr.   UNISA996465915103316

   Titolo   Recent Advances in Constraints [[electronic resource]] : 14th Annual
                        ERCIM International Workshop on Constraint Solving and Constraint
                        Logic Programming, CSCLP 2009, Barcelona, Spain, June 15-17, 2009,
                        Revised Selected Papers / / edited by Javier Larrosa, Barry O'Sullivan

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                        , 2011

   ISBN   3-642-19486-9

   Edizione   [1st ed. 2011.]

   Descrizione fisica   1 online resource (VII, 155 p.)

   Collana   Lecture Notes in Artificial Intelligence ; ; 6384

   Disciplina   005.1/16

   Soggetti   Artificial intelligence
                        Computer logic
                        Mathematical logic
                        Programming languages (Electronic computers)
                        Computer science—Mathematics
                        Algorithms
                        Artificial Intelligence
                        Logics and Meanings of Programs
                        Mathematical Logic and Formal Languages
                        Programming Languages, Compilers, Interpreters
                        Symbolic and Algebraic Manipulation
                        Algorithm Analysis and Problem Complexity

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references and index.

   Sommario/riassunto   This book constitutes the thoroughly refereed post-proceedings of the
                        14th Annual ERCIM International Workshop on Constraint Solving and
                        Constraint Logic Programming, CSCLP 2009, held in Barcelona, Spain,
                        in June 2009. The 9 revised full papers presented were carefully
                        reviewed and selected for inclusion in this post-proceedings. The
                        papers in this volume present original research results and applications
                        of constraint solving and constraint logic programming in several

domains. Among the issues addressed are solving argumentation frameworks, software consistency, modeling languages, static design routing, dynamic constraint satisfaction, and constraint-based modeling.
