1. Record Nr.   UNISA996465929003316

   Titolo   Languages and Compilers for Parallel Computing [[electronic resource]]
                        : 23rd International Workshop, LCPC 2010, Houston, TX, USA, October
                        7-9, 2010. Revised Selected Papers / / edited by Keith Cooper, John
                        Mellor-Crummey, Vivek Sarkar

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                        , 2011

   ISBN   3-642-19595-4

   Edizione   [1st ed. 2011.]

   Descrizione fisica   1 online resource (X, 278 p.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ; 6548

   Disciplina   005.13

   Soggetti   Compilers (Computer programs)
                        Computer programming
                        Artificial intelligence—Data processing
                        Artificial intelligence
                        Computer science
                        Computer networks
                        Compilers and Interpreters
                        Programming Techniques
                        Data Science
                        Artificial Intelligence
                        Models of Computation
                        Computer Communication Networks

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references.

   Sommario/riassunto   This book constitutes the thoroughly refereed post-proceedings of the
                        23rd International Workshop on Languages and Compilers for Parallel
                        Computing, LCPC 2010, held in Houston, TX, USA, in October 2010.
                        The 18 revised full papers presented were carefully reviewed and
                        selected from 47 submissions. The scope of the workshop spans
                        foundational results and practical experience, and targets all classes of
                        parallel platforms in- cluding concurrent, multithreaded, multicore,
