1.	Record Nr.	UNISA996465958903316
	Titolo	Applied Parallel and Scientific Computing [[electronic resource]] : 10th International Conference, PARA 2010, Reykjavík, Iceland, June 6-9, 2010, Revised Selected Papers, Part I / / edited by Kristján Jónasson
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2012
	ISBN	3-642-28151-6
	Edizione	[1st ed. 2012.]
	Descrizione fisica	1 online resource (XXVII, 339 p. 155 illus.)
	Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 7133
	Disciplina	004.0151
	Soggetti	Computer science—Mathematics
		Software engineering
		Algorithms
		Dynamics
		Nonlinear theories
		Mathematics—Data processing
		Computer networks
		Mathematics of Computing
		Software Engineering
		Applied Dynamical Systems
		Computational Mathematics and Numerical Analysis
		Computer Communication Networks
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references and author index.
	Sommario/riassunto	The two volume set LNCS 7133 and LNCS 7134 constitutes the thoroughly refereed post-conference proceedings of the 10th International Conference on Applied Parallel and Scientific Computing, PARA 2010, held in Reykjavík, Iceland, in June 2010. These volumes contain three keynote lectures, 29 revised papers and 45 minisymposia presentations arranged on the following topics: cloud computing, HPC algorithms, HPC programming tools, HPC in meteorology, parallel numerical algorithms, parallel computing in physics, scientific

computing tools, HPC software engineering, simulations of atomic scale systems, tools and environments for accelerator based computational biomedicine, GPU computing, high performance computing interval methods, real-time access and processing of large data sets, linear algebra algorithms and software for multicore and hybrid architectures in honor of Fred Gustavson on his 75th birthday, memory and multicore issues in scientific computing - theory and praxis, multicore algorithms and implementations for application problems, fast PDE solvers and a posteriori error estimates, and scalable tools for high performance computing.
