

1. Record Nr.	UNISA996465964903316
Titolo	TAPSOFT '87: Proceedings of the International Joint Conference on Theory and Practice of Software Development, Pisa, Italy, March 23 - 27 1987 [[electronic resource] ] : Volume 2: Advanced Seminar on Foundations of Innovative Software Development II and Colloquium on Functional and Logic Programming and Specifications (CFLP) // edited by Hartmut Ehrig, Robert A. Kowalski, Giorgio Levi, Ugo Montanari
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1987
ISBN	3-540-47717-9
Edizione	[1st ed. 1987.]
Descrizione fisica	1 online resource (XIV, 336 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 250
Disciplina	005.1
Soggetti	Software engineering Computer logic Mathematical logic Software Engineering Logics and Meanings of Programs Mathematical Logic and Formal Languages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Models and equality for logical programming -- Fifth generation computer project: Current research activity and future plans -- A compositive abstraction algorithm for combinatory logic -- Linear logic and lazy computation -- The natural dynamic semantics of mini-Standard ML -- Listlog — A PROLOG extension for list processing -- Intensional negation of logic programs: Examples and implementation techniques -- Improving the execution speed of compiled Prolog with modes, clause selection, and determinism -- Simulation results of a multiprocessor PROLOG architecture based on a distributed and/or graph -- Generating efficient code from strictness annotations -- Hoisting: Lazy evaluation in a cold climate -- Inductive assertion method for logic programs -- Higher order generalization in program derivation -- Implementing algebraically specified abstract data types

in an imperative programming language -- A declarative environment for concurrent logic programming -- Or-parallel execution models of Prolog -- Retractions: A functional paradigm for logic programming -- Refined strategies for semantic unification -- Extensional models for polymorphism -- A type discipline for program modules -- Theory and practice of canonical term functors in abstract data type specifications.

---
