   Sommario/riassunto   This book constitutes the thoroughly refereed post-conference
                         proceedings of the 28th International Workshop on Languages and
                         Compilers for Parallel Computing, LCPC 2015, held in Raleigh, NC, USA,
                         in September 2015. The 19 revised full papers were carefully reviewed
                         and selected from 44 submissions. The papers are organized in topical
                         sections on programming models, optimizing framework, parallelizing
                         compiler, communication and locality, parallel applications and data
                         structures, and correctness and reliability.
