1.	Record Nr.	UNISA996466029603316
	Titolo	Flexible Query Answering Systems [[electronic resource]] : 10th International Conference, FQAS 2013, Granada, Spain, September 18-20, 2013. Proceedings / / edited by Henrik Legind Larsen, Maria J. Martin-Bautista, María Amparo Vila, Troels Andreasen, Henning Christiansen
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
	ISBN	3-642-40769-2
	Edizione	[1st ed. 2013.]
	Descrizione fisica	1 online resource (XVI, 694 p. 208 illus.)
	Collana	Lecture Notes in Artificial Intelligence ; ; 8132
	Disciplina	006.3
	Soggetti	Artificial intelligence
		Information storage and retrieval
		Data mining
		Database management
		Application software
		Natural language processing (Computer science)
		Artificial Intelligence
		Information Storage and Retrieval
		Data Mining and Knowledge Discovery
		Database Management
		Information Systems Applications (incl. Internet)
		Natural Language Processing (NLP)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di contenuto	Querying-answering systems -- Semantic technology -- Patterns and classification -- Personalization and recommender systems -- Searching and ranking.- Web and human-computer interaction -- Environmental scanning for strategic early warning -- Generating linguistic descriptions of data -- Advances in fuzzy querying and fuzzy databases: theory and applications -- Fusion and ensemble techniques for online learning on data streams.- Intelligent information extraction

from texts.

Sommario/riassunto

This book constitutes the refereed proceedings of the 10th International Conference on Flexible Query Answering Systems, FQAS 2013, held in Granada, Spain, in September 2013. The 59 full papers included in this volume were carefully reviewed and selected from numerous submissions. The papers are organized in a general session train and a prallel special session track. The general session train covers the following topics: querying-answering systems; semantic technology; patterns and classification; personalization and recommender systems; searching and ranking; and Web and human-computer interaction. The special track covers some some specific and, typically, newer fields, namely: environmental scanning for strategic early warning; generating linguistic descriptions of data; advances in fuzzy querying and fuzzy databases: theory and applications; fusion and ensemble techniques for online learning on data streams; and intelligent information extraction from texts.
