1. Record Nr.   UNISA996466037803316

   Titolo   Haptic and audio interaction design : second international workshop,
                            HAID 2007, Seoul, South Korea, November 29-30, 2007 : proceedings /
                            / Ian Oakley, Stephen Brewster (editors)

   Pubbl/distr/stampa   Berlin ; ; Heidelberg ; ; New York : , : Springer, , [2007]
                            ©2007

   ISBN   3-540-76702-9

   Edizione   [1st ed. 2007.]

   Descrizione fisica   1 online resource (XIV, 145 p.)

   Collana   Lecture notes in computer science ; ; 4813

   Disciplina   004.019

   Soggetti   Human-computer interaction

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Plenary Talks -- Self-produced Sound: Tightly Binding Haptics and
                            Audio -- Will Haptics Technology Be Used in Mobile Devices?: A
                            Historical Review of Haptics Technology and Its Potential Applications
                            in Multi-modal Interfaces -- Session: Tactile Displays -- Tactile
                            Visualization with Mobile AR on a Handheld Device -- Mobile Multi-
                            actuator Tactile Displays -- Comparison of Force, Tactile and
                            Vibrotactile Feedback for Texture Representation Using a Combined
                            Haptic Feedback Interface -- Session: Communication and Games --
                            Shake2Talk: Multimodal Messaging for Interpersonal Communication
                            -- Communication-Wear: User Feedback as Part of a Co-Design
                            Process -- Interactive Racing Game with Graphic and Haptic Feedback
                            -- Session: Accessibility and Navigation -- Obstacle Detection and
                            Avoidance System for Visually Impaired People -- Tangible User
                            Interface for the Exploration of Auditory City Maps -- Haptic and Sound
                            Grid for Enhanced Positioning in a 3-D Virtual Environment -- Session:
                            Design -- User-Centered Design Proposals for Prototyping Haptic User
                            Interfaces -- Designing Eyes-Free Interaction -- Beyond Clicks and
                            Beeps: In Pursuit of an Effective Sound Design Methodology.
