

1. Record Nr.	UNISA996466064003316
Titolo	Ambient Intelligence in Everyday Life [[electronic resource] ] : Foreword by Emile Aarts // edited by Yang Cai, Julio Abascal
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006
ISBN	3-540-37788-3
Edizione	[1st ed. 2006.]
Descrizione fisica	1 online resource (XIV, 322 p.)
Collana	Lecture Notes in Artificial Intelligence ; ; 3864
Disciplina	004.01/9
Soggetti	Artificial intelligence User interfaces (Computer systems) Computers and civilization Application software Computer communication systems Software engineering Artificial Intelligence User Interfaces and Human Computer Interaction Computers and Society Information Systems Applications (incl. Internet) Computer Communication Networks Software Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The Workshop of Ambient Intelligence in Everyday Life that was held ... in Donostia-San Sebastian, Spain, July 21-22, 2005"--Pref.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Human-Centric Computing -- Common Sense Reasoning -- From Cyc to Intelligent Assistant -- Face for Ambient Interface -- Empathic Computing -- Location and Activity Recognition Using eWatch: A Wearable Sensor Platform -- Ambient Interfaces -- Co-Creation in Ambient Narratives -- Living with Hyper-reality -- Ambient Pre-Communication -- AmbientBrowser: Web Browser in Everyday Life -- Online Music Search by Tapping -- Whistling to Machines -- Speaker Identification and Speech Recognition Using Phased Arrays -- Architectures in Ambient Intelligence -- A Middleware for the Deployment of Ambient Intelligent Spaces -- Ambient Interfaces for

Elderly People at Home -- A Smart Electric Wheelchair Using UPnP -- Collaborative Discovery Through Biological Language Modeling Interface.

---

Sommario/riassunto

Ambient Intelligence refers to smart electronic environments that are sensitive and responsive to the presence of people. Since its introduction in the late 1990s, this vision has matured, having become quite influential in the development of new concepts for information processing as well as combining multi-disciplinary fields including computer science, electrical engineering, industrial design, architectural design, user interfaces, and cognitive science. Originating from the Workshop on Ambient Intelligence in Everyday Life held at the Miramar Congress Center, San Sebastian, Spain, in July 2005, this book is devoted to the cognitive aspects of ambient intelligence. The 15 carefully reviewed and revised articles presented are organized in topical sections on human-centric computing, ambient interfaces, and architectures for ambient intelligence.
