

1. Record Nr.	UNISA996466092703316
Titolo	Research and advanced technology for digital libraries : second european conference, ecdl'98, heraklion, crete, greece, september 21-23, 1998, proceedings // edited by Christos Nikolaou, Constantine Stephanidis
Pubbl/distr/stampa	Berlin, Germany ; ; New York, New York : , : Springer, , [1998] Â©1998
ISBN	3-540-49653-X
Edizione	[1st ed. 1998.]
Descrizione fisica	1 online resource (XXX, 918 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 1513
Disciplina	025.00285
Soggetti	Digital libraries - Europe
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Talks -- Papers -- Posters -- Panels -- Special Sessions -- Delos Workshop -- Demonstrations.
Sommario/riassunto	Digital Libraries are complex and advanced forms of information systems which extend and augment their physical counterparts by amplifying existing resources and services and enabling development of new kinds of human problem solving and expression. Their complexity arises from the data-rich domain of discourse as well as from extended demands for multi-disciplinary input, involving distributed systems architectures, structured digital documents, collaboration support, human-computer interaction, information filtering, etc. In addition to the broad range of technical issues, ethics and intellectual property rights add to the complication that is normally associated with the development, maintenance, and use of Digital Libraries. The Second European Conference on Digital Libraries (ECDL' 98) builds upon the success of the first of this series of European Conferences on Research and Advanced Technology for Digital Libraries, held last year in Pisa, Italy, September 1-3, 1997. This series of conferences is partially funded by the TMR Programme of the European Commission and is actively supported and promoted by the European Research Consortium on Informatics and Mathematics (ERCIM). The aim is to bring together the different communities

involved in the development of Digital Libraries, to review progress and to discuss strategies, research and technological development (RTD) issues, as well as specific topics related to the European context. These communities include professionals from universities, research centres, industry, government agencies, public libraries, etc.
