

1. Record Nr.	UNISA996466108303316
Titolo	Logic Based Program Synthesis and Transformation [[electronic resource]] : 15th International Symposium, LOPSTR 2005, London, UK, September 7-9, 2005, Revised Selected Papers // edited by Patricia M. Hill
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006
ISBN	3-540-32656-1
Edizione	[1st ed. 2006.]
Descrizione fisica	1 online resource (X, 182 p.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 3901
Disciplina	005.1015113
Soggetti	Computer science Artificial intelligence Computer programming Machine theory Computer Science Logic and Foundations of Programming Artificial Intelligence Programming Techniques Formal Languages and Automata Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Held concurrently with SAS 2005, the Symposium on Static Analysis in Imperial College, University of London.
Nota di bibliografia	Includes bibliographical references and author index.
Nota di contenuto	Temporal Logic Constraints in the Biochemical Abstract Machine BIOCHAM -- Temporal Logic Constraints in the Biochemical Abstract Machine BIOCHAM -- Tools for Program Development -- Declarative Programming with Function Patterns -- Transformational Verification of Parameterized Protocols Using Array Formulas -- Design and Implementation of : A Real-Time Action Description Language -- Program Transformations -- An Algorithm for Local Variable Elimination in Normal Logic Programs -- Removing Superfluous Versions in Polyvariant Specialization of Prolog Programs -- Extension of Type-Based Approach to Generation of Stream-Processing Programs by Automatic Insertion of Buffering Primitives -- Non-leftmost Unfolding in Partial Evaluation of Logic Programs with Impure

Predicates -- Software Development and Program Analysis -- A
Transformational Semantics of Static Embedded Implications of Normal
Logic Programs -- Converting One Type-Based Abstract Domain to
Another -- Experiments in Context-Sensitive Analysis of Modular
Programs.
